Azure VMware Solution Fast Start

Business challenge

Every business today is looking for ways to modernize the IT environment. Yet, as cost pressures mount, it's also important to drive transformation in ways that leverage as much existing infrastructure and investments as possible.

Azure VMware Solution enables you to seamlessly move VMware-based workloads from your datacenter to Azure and integrate your VMware environment with Azure. You can keep managing your existing environments with the same VMware tools that you already know while you modernize your applications with Azure native services.

How we help

Insight's Azure VMware Solution (AVS) Pilot will help educate and equip your organization to take advantage of AVS and accelerate your adoption of Azure.

Through a series of discussions and discovery sessions, as well as pilot environment implementation, demonstration, and education, our highly skilled experts will work with your team to pilot AVS to give you the confidence to move forward with your production migration

How to prepare

To ensure you receive the greatest value from this engagement, you'll need:
- Intent to move forward with a cloud migration in the next 3-6 months.
- Existing on-premises VMware environment
- Azure subscription

Duration
3 weeks

Benefits
- Get familiar with AVS architecture, features, and capabilities

- Review requirements and test cases for the AVS Pilot deployment

- Deployment of an AVS Pilot environment, including a single 3-node AVS cluster in Azure

- Demonstration and pilot of AVS capabilities

- Identification of next steps to conduct a production deployment to Microsoft Azure

Our Approach

Overview and Planning	Environment Deployment	Outcome and Review
The engagement begins with a series of workshops to provide an overview of AVS architecture and capabilities, as well as gather specific requirements for your pilot deployment.	Our AVS experts will deploy a pilot environment aligned to your organization's requirements. This includes deployment of a 3-node AVS cluster to a single region, network connectivity, and connection to vCenter and NSX-T manager.	After working with your team to execute on test cases and defined pilot scenarios, we'll review the outcomes together and discuss your organization's next steps for a production migration using Azure VMware Solution.

Awards and partnerships

vmware®

- **Vmware Certified**
  - VCAP-DCV
  - VCAP-NV

Competencies:

- Datacenter Virtualization Master Services Competency
- Cloud Management and Automation
- Digital Workspace
- Network Virtualization
- VMware Cloud on AWS

Microsoft

- **Azure Expert MSP**

  Gold Microsoft Partner / Azure Expert MSP

- **Azure Gold Partner**

  Microsoft Gold Partner

- **Advanced Specializations:**
  - Windows Server and SQL Server Migration to Microsoft Azure
  - Data Warehouse Migration to Microsoft Azure
  - Kubernetes on Microsoft Azure
  - Modernization of Web Applications to Microsoft Azure

About Insight

At Insight, we define, architect, implement and manage Insight Intelligent Technology Solutions™ that help your organization run smarter. We'll work with you to maximize your technology investments, empower your workforce to work smarter, optimize your business and create meaningful experiences.
