

Rapid Application Migration for SMBs

Application Assessment - Complimentary

Migrate your workloads to Azure Cloud in 2 Weeks

Are you a small/ medium business who need migrating your workloads to Azure Cloud? Then you have reached out to the right partner. Newt Global can take care of every step of your journey and help you migrate your workloads to Azure cloud within 2 weeks. All of this is to help you save big on overheads you spend on your on-prem infrastructure. As a first step, we offer quick assessment of your application for cloud readiness at **zero cost** to you. In about 4 hours of effort for the complimentary assessment we provide a report on whether your application can be taken to cloud as it is or will need any application remediation/upgrades.

Newt Global SMB segment has done 100+ application migrations for our customers using FREE cloud native automation tools, which ensures application migration is done faster, cheaper and with high accuracy.

What do we offer?

- Application assessment and figure out complexity
- Creation of Infrastructure on cloud
- Deployment of applications on virtual servers in the cloud
- Deployment of Database on cloud
- Provisioning of any other components needed for application functionality in cloud

What do you get?

- Migrate applications based on identified workloads.
- Migrate databases from the existing system to Azure (Homogenous DB migration)
- Migrate data from on-prem to Azure at lesser interruption
- Functional and performance testing of your application on Azure cloud (Sample testing to prove successful migration)
- Ensure smooth transition of your business to seamlessly run on Azure Cloud

What are the criteria?

- Up to 10 VMs or services (Maximum computing capacity provisioned: vCPU < 40, RAM < 160 GB, Storage < 10 GB)
- Data to migrate – maximum 10 GB
- Dedicated support from the customer side Application and Database team during the migration
- Customer will bring their own licenses for all required servers, software applications and other required tools
- No application code re-engineering, re-factoring, modernization, or bug fixes will be done

The fee for this end to end Azure migration is only for resources you use and expected to be maximum of **US \$1,999**
