EDI-2-FLOW for Dynamics 365

Migrating to a cloud-based EDI solution is a progressive step for your organization, and choosing TIE Kinetix's 33+ years' experience guarantees a successful transition into your new SaaS environment. For most organizations, outsourcing EDI operations is a smart move—it's practical, economical, and fundamentally scalable. With TIE Kinetix's ever-evolving electronic document exchange solutions, you'll quickly benefit from best-in-class automation capabilities all while avoiding costly on-premise software investments.

In partnership with

TO INCREASE 

The Total Package

The package includes everything you need to successfully begin exchanging documents electronically through Dynamics 365. The specific solutions and products included are as follows: TIE Kinetix EDI-2-FLOW solution and To-Increase's EDI Studio and Connectivity Studio products. The entire package, as well as its implementation, is delivered in full by TIE Kinetix.

TIE Kinetix's EDI-2-FLOW for Dynamics 365 solution package provides you with all the tools you need to start exchanging documents electronically today, all for one monthly SaaS fee. Here's a brief overview of the individual solutions included in the package:

EDI-2-FLOW at a Glance

TIE Kinetix's EDI-2-FLOW solution requires no extensive IT investment. Costly on-premise software is replaced with a flexible monthly fee to fit your usage. EDI-2-FLOW helps you to achieve faster business transactions and automate procure-to-pay processes for full financial supply chain transparency. With quick and easy implementation, you are directly integrated with Microsoft Dynamics 365 through To-Increase's EDI Studio and Connectivity Studio products.

With TIE Kinetix's extensive partner network, you can leverage a network of more than 300,000 trading partner connections and a rich library of trading partner maps and application connectors. With 24/7 monitoring and validation, bad data is something from the past; you receive notifications to correct inaccurate data (incoming or outgoing) before it's too late.

EDI Studio at a Glance

To-Increase EDI Studio for Microsoft Dynamics 365 helps companies simplify communication and collaboration with customers and trading partners through electronic document interchange (EDI). The solution fully integrates with Microsoft Dynamics 365 and support's the ERP system's data model, whereas some tools available today lack full integration capabilities and do not consider business rules, which means extra work for IT.

24/7 document
monitoring & validation

EDI Studio helps IT managers support changing business requirements without coding. Instead, they can set up and modify integrations efficiently through standardized configurations.

Benefits

- Optimize your supply chain through automatic ordering and streamlined communication
- Simplify IT administration with standard configurations, tracking, and control capabilities
- Easily exchange common business documents such as orders, acknowledgments, advance shipping notices, and invoices
- Validate incoming sales orders and purchase order confirmations by means of a staging journal
- Use journal validations to ensure a smooth order process before creating a sales order in Microsoft Dynamics 365

Connectivity Studio at a Glance

Take advantage of To-Increase Connectivity Studio for Microsoft Dynamics 365 to simplify the setup and management of integrations between your ERP and other business systems. Because the solution supports many document types, you can directly meet business requirements instead of managing technical details. This enables you to rapidly configure, execute, and manage data migration and integration projects.

Benefits

- Integrate Microsoft Dynamics 365 with external applications with full support for third-party software and your own customizations
- Simplify integration setup by using configuration rather than coding
- Quickly and reliably perform very large data imports and exports
- Produce greater business value from applications you already own
- Continue working productively with your preferred document formats such as Microsoft Excel, XML, text, fixed text, ODBC, EDIFACT, X12, and others

Get Started with EDI-2-FLOW for Dynamics 365 Today!

With the cloud-based EDI-2-FLOW for Dynamics 365 solution, you're covered on all fronts.
