

# Build knowledge, process, and profitability with AVEVA Unified Supply Chain

## ABOUT AVEVA:

We work with you and harness the power of our ecosystem to deliver solutions and expertise to optimize engineering, operations, and performance. From water and energy to food and infrastructure, our solutions transform opportunity into business value.

### *See what customers are saying:*

*"Believe it or not, for the same data set, the same crude and feed stocks, the same units, what used to take us seven hours to run now takes just over three minutes. I have to admit I didn't really think that we'd get that out of cloud, so it has been quite revolutionary for us."*

– Claire Dickson, CIO of Downstream, BP

## WHAT WE OFFER

Legacy point solutions prevent companies from effectively reacting to rapidly changing marketing conditions. AVEVA Unified Supply Chain's single source of knowledge allows enterprises to share and communicate decisions between diverse teams, promoting collaboration and discussion across global locations.

AVEVA Unified Supply Chain ensures security and visibility of supply chain knowledge, with simple, consistent access to data and easy integration to external business systems.

For the first time, planning, scheduling, assay, and supply distribution can share the same understanding of the plant and of the business. Let users concentrate on their tasks while building on established business rules.

Easy and fast to learn and use, AVEVA Unified Supply Chain lets new and experienced users quickly start making and sharing decisions. The solution offers seamless transfer of data between the specialized modules, full transparency in the changes between individuals, and simple customization to let users see input and output in the manner most familiar to them. Make decisions you can understand and implement, with confidence to adapt as the business needs grow.

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

**Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.**
