Electronic Signature:

Any letters, numbers, symbols, voice or processing system in Electronic form applied to, incorporated in, or logically associated with a Data Message with the intention of authenticating or approving the same

Secure Electronic Signature:

An Electronic Signature which meets the requirements set out in Article (18) of this Law

Five: Electronic Signature

Article (8)

- 1- Where a rule of law requires a signature on a document, or provides for certain consequences in the absence of a signature, that rule is satisfied if the document contains a reliable Electronic Signature within the meaning of Article (18) of this Law
- 2- Absent contrary statutory provision, a person may use any form of Electronic authentication

Seven: Admissibility and Evidential Weight of Electronic Records

Article (10)

- 1- In any legal proceedings, nothing in the application of the rules of evidence shall apply so as to prevent the admission of a Data Message or Electronic Signature in evidence:
 - a) on the grounds that the message or signature is in Electronic format; or
 - b) if it is the best evidence that the person adducing it could reasonably be expected to obtain, on the grounds that the message or signature is not original or in its original form
- 2- In assessing the evidential weight of Electronic Information, regard shall be given to:
 - a) the reliability of the manner in which one or more of the operations of executing, entering, generating, processing, storing, presenting or communicating was performed;
 - b) the reliability of the manner in which the integrity of the information was maintained;
 - c) the reliability of the source of information, if identifiable;
 - d) the reliability of the manner in which the Originator was identified;
 - e) any other factor that may be relevant
