NEXTGATE

Corporate Overview

TRANSFORMING THE HEALTHCARE ENTERPRISE WITH PATIENT AND PROVIDER IDENTIFICATION SOLUTIONS

Company Profile

With over 200 customers in nine countries, NextGate is the global leader in healthcare enterprise identification. Committed to helping organizations overcome the clinical, operational and financial challenges that result from duplicate and disparate data, our full suite of identity matching solutions connects the entire healthcare ecosystem to drive critical improvements in quality, efficiency and safety.

NextGate's Software as a Service (SaaS) offerings are hosted in a secure, HIPPA-compliant cloud platform on Amazon Web Services (AWS). Our application stack is designed to be highly available and uses multiple availability zones of AWS regions for continuous performance without interruptions. This includes NextGate's flagship Enterprise Master Patient Index (EMPI), which currently manages more than 350 million lives worldwide.

Product Offerings

Today, healthcare organizations are faced with the question of how they will transform their business while meeting the demands of value-based care. To support our customers' transformation to become true digital enterprises, we offer innovative solutions in a SaaS-based, cloud environment.

NextGate's identification solutions in the cloud connects your complex healthcare IT environment with **scalable, automated tools** that deliver an accurate, centralized view of patients and providers.

NEXTGATE AT-A-GLANCE

Pasadena, California

Regions served:
U.S., U.K., Canada, Europe, Middle East and Australia

Operations:
9 countries
200+ customers
350+ million unique identifiers managed across the globe
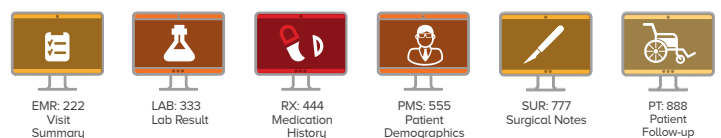

Product Portfolio

EMPI

Designed for today's complex IT environment, NextGate's Enterprise Master Patient Index enables a full picture of one's health and medical history for enhanced clinical decision-making, improved patient safety and a seamless provider experience. As a strategic component for interoperability and coordination of care, the EMPI aggregates and links records in any given system and reconciles data discrepancies across the continuum for a single best patient record.

Built on the MatchMetrix® master identity platform, the NextGate EMPI:

- Automates patient data and duplicate record clean-up
- Reduces denied medical claims and other financial delays
- Reduces costs and risks associated with redundant medical procedures and tests
- Streamlines patient registration, prevents data errors at point of capture
- Improves patient safety and satisfaction

ENTERPRISE UNIQUE ID SERVES AS A LINK TO A PATIENT'S RECORDS IN ANY SYSTEM:

| EMR: 222 Visit Summary | LAB: 333 Lab Result | RX: 444 Medication History | PMS: 555 Patient Demographics | SUR: 777 Surgical Notes | PT: 888 Patient Follow-up |

Product Portfolio

Provider Registry

Our Provider Registry delivers a centralized, single source of truth for physician and provider data across all systems within the enterprise, including claims, contracting and credentialing applications.

Relation Registry

Our Relation Registry is an enterprise solution that connects patient-provider relationships and links individuals to their entire care team for improved coordination and collaboration.

The NextGate Difference
Focus on Interoperability and Integration

Challenge:

As healthcare data proliferates, fragmented patient information trapped in silos continues to be a significant barrier to tackling rising healthcare costs and improving the quality, safety and delivery of care. A longitudinal view of an individual's medical record sets the foundation for informed clinical decision-making, healthier populations and improved patient experiences.

Solution:

NextGate is the gold standard in patient identification and delivers bidirectional connectivity across systems to facilitate accurate, real-time data from provider to provider.

Our technology:

- aggregates clinical, financial, and demographic data
- proactively manages, detects and eliminates data quality issues
- delivers a trusted, reliable record of care

NextGate's solutions portfolio provides the tools to streamline identity management for providers, organisations, places, and events to improve data quality and enable collaboration at entirely new levels of insight and ease.

Recognised as a 2019 Next-Generation EMPI Vendor by Gartner.
