

akaChain is a suite of ready-made blockchain solutions, including traceability, loyalty and reward network, and token management platform.

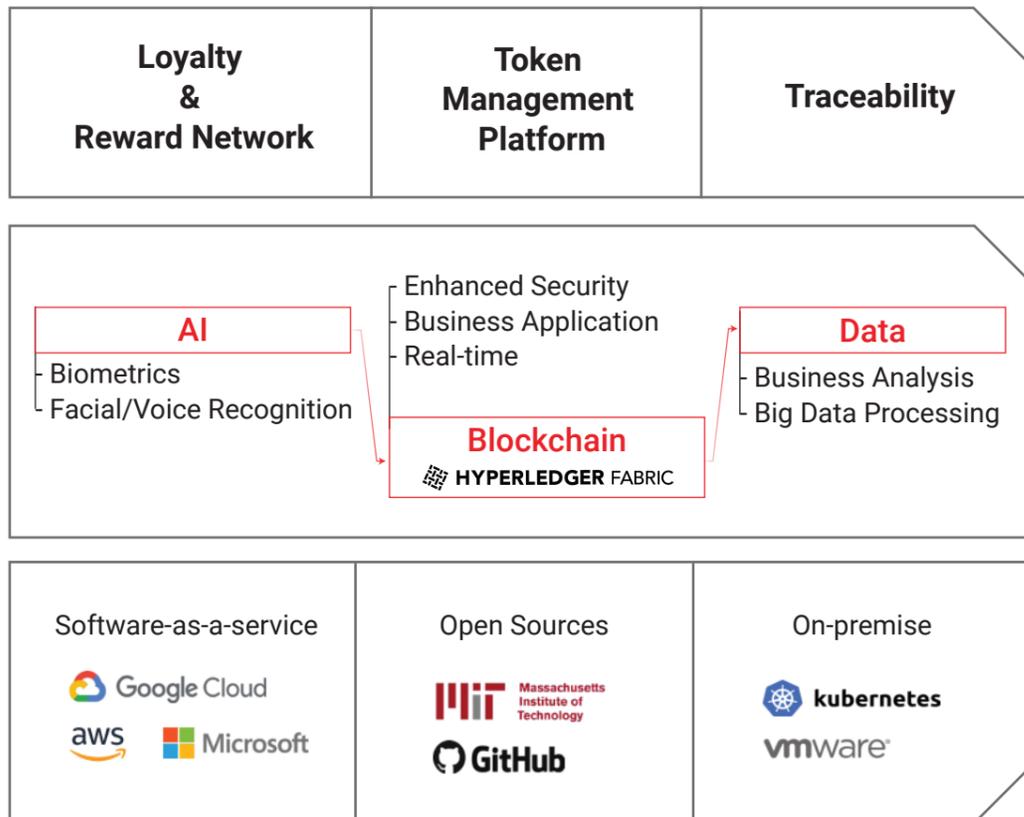

akaChain offers a wide range of solutions with little upfront investment, helping enterprises to achieve their visions, with the transparency and enhanced security provided by the nature of blockchain technology.

CHALLENGES

The number of successful blockchain use cases is limited. Bringing blockchain to the existing business system requires complicated methodology and cumbersome IT workforce. With this inertia, enterprises are reluctant toward the buzzword blockchain.

ABOUT AKACHAIN

HIGHLIGHTS

High throughput and low latency, shown through number of transaction per second

Customizable, respond to the business needs

Security and transparency for every partner

Flexible deployment infrastructure, on cloud or on-premise

BENEFITS

Rapid time-to-market

With the ready-made blockchain backed solutions, time-to-market is reduced, helping enterprises to introduce the new products or technology rapidly to the public.

Operation Efficiency

By creating a seamless network amongst multiple partners, blockchain fosters the real-time communication, cutting the laborious operational effort.

Privacy and Data Protection

The nature of blockchain makes on-chain data incorruptible, improving the integrity and transparency of data.
