

Nuboj® is the **ready-to-use**, intelligent **IoT product** by Tempestive.
Nuboj® collects and analyzes data from connected machines to transform them into useful results **to improve** the **business** of device manufacturing and management companies.
Some of the **results achieved** by our customers who have already chosen Nuboj®:

FROM INTERNET OF THINGS TO **INTERNET OF RESULTS.**

EFFICIENCY

Through analytics and the insights, you can optimize production and improve machine utilization.

NEW BUSINESS

With a different perspective on machines, you can identify new services directly related to your own, generating new revenue

CUSTOMER CARE

Collected data enables the study of previously unknown information: end customer usage habits, machine status for both engineering and commercial purposes.

MONITORING

With real-time machine information, you can intervene promptly, giving customers a compelling reason to be chosen.

PROACTIVITY

Thanks to the binomial monitoring/know-how, you can take more care of the customer, ensuring a correct and more performing use of the purchased product.
