Navertica POS Base CZ

More effective sales processes

Navertica POS Base CZ offers the new standard in sales services within the point-of-sales that offers fast customer service, easy operation and flawless sales process completion.

Within the solution posting functions that work in the real time are integrated, including efficient system for warehouse management, which enables the access to the item availability information for each shop and item reservations for customers.

Navertica POS Base CZ is fully integrated into Microsoft Dynamics 365 Business Central, which allows usage of the whole scale of functionality of this modern information system.

Feature	Benefit
Fully integrated into Microsoft Dynamics 365 Business Central	No mistakes when transferring data between often incompatible systems
Centralized item availability information	Overview of item availability on all shops
Shop inventory management	Possibility to optimize item inventory and issue transfer orders between shops
Bar Codes	Extremely faster customer service and no mistakes when entering data
Discount management	Several possibilities of managing discount vouchers and customer discounts
Drawer operations management	Having exact overview of all performed transactions and the actual balance
Customer Reservations	Increasing customer loyalty and satisfaction
Several payment methods for one bill	No need to create multiple bills for various payment methods
