

e^knowtion

Data is power. It just works.

Who Are We?

We are a Microsoft consultancy firm based in Melbourne, Australia with over a decade of experience in the world of Business Intelligence (BI) and Enterprise Resource Planning (ERP).

As a Microsoft Partner in Data Analytics, we have the skills and experience to turn data into valuable information and help move our clients' businesses forward.

Dedicated to providing deep insights and reliable solutions, we will be our clients' trusted advisor and expert that they can count on.

Our Mission

Empowering clients to grow their business and maximise profits.

Proper solution design and clear communication are at the core of how we operate.

Our mission is to help businesses solve all reporting and analytics needs by providing a suite of Power BI pre-designed reports that bridge the gap between data and knowledge.

How We Work

Our clients will get the most outcome for the best price on the market. We are always willing to match the price to competitor's lower price. Our range of reports are designed with your needs in mind and to give access to their data as simply and cost effective as possible.

With a client-focused and result-driven approach, we build an in-depth understanding of our clients' objectives to deliver quality solutions for their business.

We will problem-solve with clients to design solutions that will allow them to optimise and automate business processes so they can achieve the highest operational efficiency and effectiveness.

How many times has the inability to access information impeded your ability to see the bigger picture?

Are you happy with your reporting and analytics?

Our market research shows these are the main concerns that businesses have with accessing data and reporting:

Reporting is complicated

Data is duplicated across multiple reports

Slow and time consuming

Reports provide Insufficient information

Reporting is costly and dependent on IT

The Problem

Many businesses struggle to take advantage of the valuable and vast amount of information that Microsoft Dynamics 365 Business Central collects

Companies would overspend their budget for written reports to get access to their data

The Solution

Deploy a single, comprehensive BI solution

Our Power BI apps will offer clients immediate visibility over their business operations and finances instead of waiting weeks or months for reports to be designed, validated and installed.

Competitive Advantages

Experience

In our 12+ years of extensive industry experience, eKnowtion has gained an abundance of knowledge and best practices to quickly re-use and implement in your business where possible, delivering fast and lasting value.

Affordability

Our technical depth and expertise will provide successful business results on time and on budget. Business Central Insights apps are available as a monthly subscription for our clients, with a risk-free 30 days evaluation (trial) period and the option to cancel subscription at any time.

Flexibility

Small or large databases, Business Central Insights apps can scale - meaning the program can grow with your business.

We will always listen to your feedback and use it to improve our products.

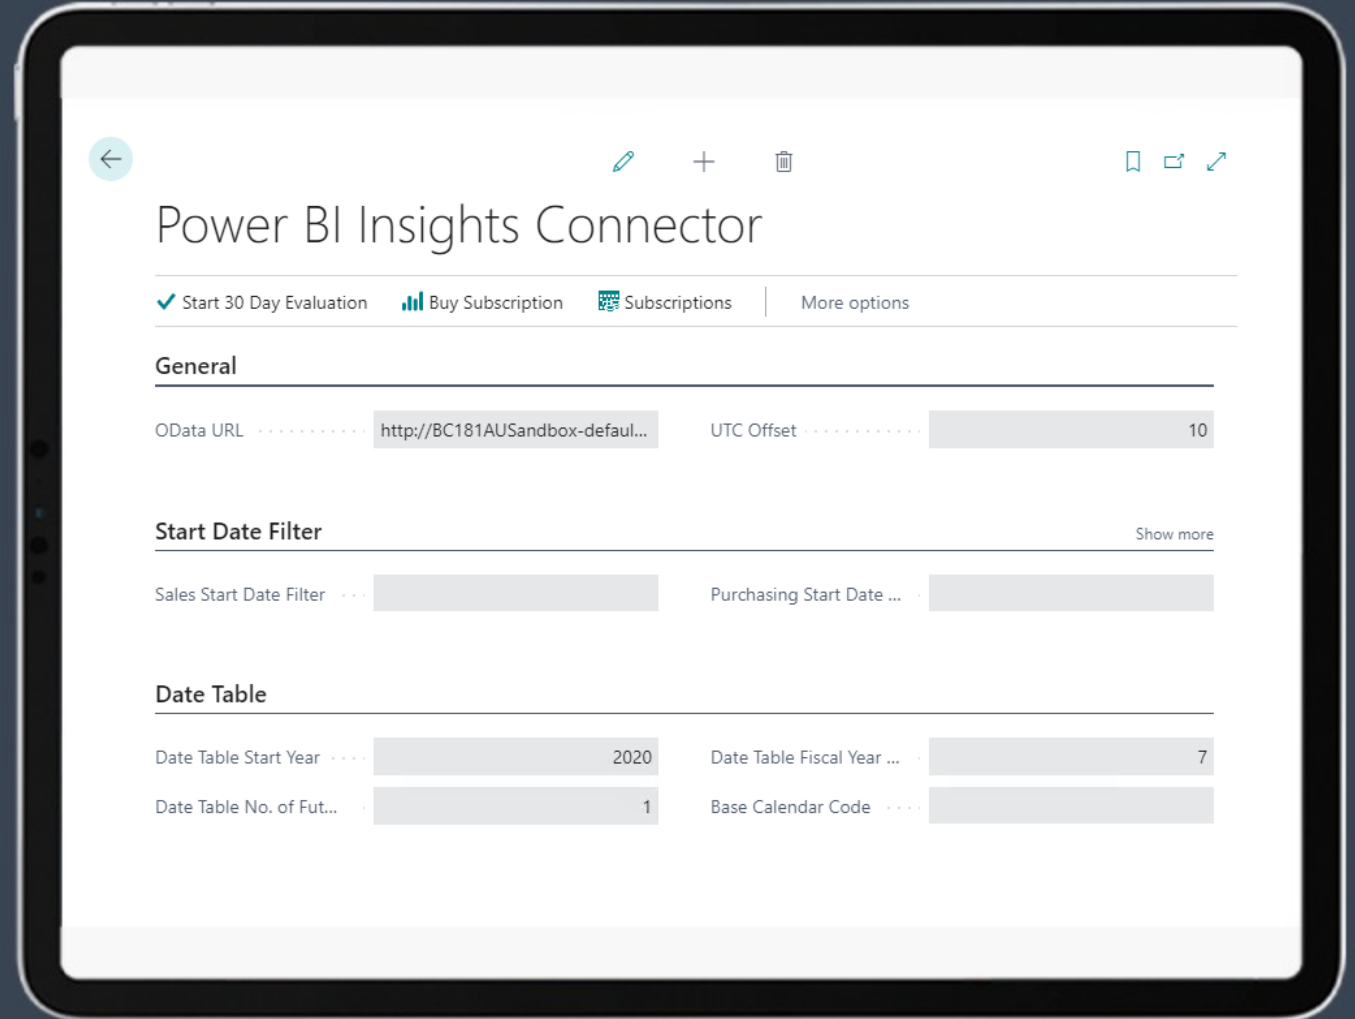

Connect your business

Get the complete picture from across your business, with reports when and where you need them.

Configure to your needs

Power BI Insights Connector lets you set each KPI lower and upper boundaries to reflect your industry standards.

You can also filter source tables to import only data you need.

The screenshot shows the 'Power BI Insights Connector' configuration page. At the top, there are navigation icons (back, edit, add, delete) and a title bar. Below the title bar, there are links for 'Start 30 Day Evaluation', 'Buy Subscription', 'Subscriptions', and 'More options'. The main configuration area is divided into three sections: 'General', 'Start Date Filter', and 'Date Table'. Each section contains input fields for various settings.

Section	Field	Value
General	OData URL	http://BC181AUSandbox-default...
	UTC Offset	10
Start Date Filter	Sales Start Date Filter	
	Purchasing Start Date ...	
Date Table	Date Table Start Year	2020
	Date Table Fiscal Year ...	7
	Date Table No. of Fut...	1
Date Table	Base Calendar Code
