The Peltarion Platform is an operational AI platform where you can design AI models to solve problems

Left panel

... start experimenting with AI ideas without having to hire a dedicated in-house AI team

... waste valuable time dealing with non-modelling tasks

... press "launch" and start benefiting from your AI projects in minutes

Peltarion Platform

One platform, everything you need

When you could...

TEST
Quickly test and evaluate your AI ideas without making large upfront investments

LAUNCH
Seamlessly go from prototypes to customer facing applications

ITERATE
Easily and cheaply iterate, refine, and update projects on a regular basis

GROW
Grow the audience of your applications without worry-ing about the engineering

Right panel

One-click deployment
Access your model via Rest-API and integrate your model predictions into your own application
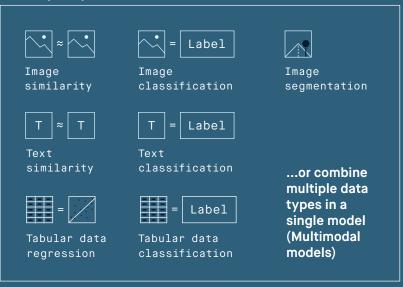

All in one place
Own the whole development process from building over tweaking to deployment

Always cutting edge
Use the latest deep learning techniques without needing to implement them yourself

One stop shop for...

Image similarity

Image classification

Image segmentation

Text similarity

Text classification

Tabular data regression

Tabular data classification

...or combine multiple data types in a single model (Multimodal models)
