

Modernize & Automate Business Processes With Power Apps

Demo & Assessment

It's time to upgrade InfoPath Forms & SharePoint Workflows

Microsoft announced in July 2020, that all SharePoint 2010 workflows will stop working on Microsoft 365 as of November 1, 2020. InfoPath and SharePoint 2013 workflows are certain to soon follow.

If you're already on Microsoft 365, there are plenty of compelling reasons to upgrade your forms and flows to Power Apps now, regardless of Microsoft's announcements.

Let us show you what Power Apps can do

We'll demo the features and review your current business application processes to create your upgrade roadmap.

WHY POWER APPS?

- ✓ **Create apps for any device:** with a wide variety of controls including cameras and location
- ✓ **Connect to multiple data sources:** Azure, Marketo, Salesforce, SAP, SQL and more
- ✓ **Automate repetitive tasks:** whether cloud-based or on-premises, with old apps and new
- ✓ **Integrated with M365:** centralized user management and quick integrations between Microsoft 365 apps

Reduce Errors

Automate repetitive, manual and mundane tasks and free up your staff to focus on strategic endeavors

Improve Productivity

15% average improvement in efficiencies*

Save Money

362% ROI* over three years when automating processes with Power Apps and Power Automate

*Forrester (2018, October). The Total Economic Impact™ Of The Microsoft 365 E5 Solutions.
