Ondato: SMS Signature

The tool that enables closing business deals remotely and safely

Highest Security

- Uniquely linked to the signatory
- A custom, single-use PIN code for signing
- Advanced encryption technologies

Fast and Simple Use

- Completed with a simple text message
- Signing process in under 20 seconds
- No integration or IT resources required

Complete Coverage

- Supports all electronic documents
- Compatible with any cell phone
- Worldwide customer accessibility

“The key value of the SMS Signature tool is that we are now able to provide the possibility of remotely closing agreements to anyone who does not have a qualified e-signature. To both Fjord Bank and our clients this solution saves business deals, reduces costs as well as resources, and creates a frictionless experience.” – Fjord Bank

Over 95% of SMS messages are read by recipients in under three minutes - 5,900% faster than an average email response.

Emerging Challenge

It has become difficult to ensure a fast and secure way of closing business agreements from anywhere the world

Remote business operations require top-level security while delivering an effortless experience for customers.

Our Solution

An advanced electronic signature tool that is enabled with a simple text message

SMS Signature works in three simple steps:

- Document requiring signature is reviewed by client;
- A 6-digit PIN code is sent to user's phone number via SMS;
- Received code is submitted, automatically signing the document.

Guaranteed Outcome

Expanded accessibility for customers and accelerated business operations for companies

Finalize business agreements instantly and securely by reaching clients anywhere in the world.

Case Study: Fjord Bank

Fjord Bank became the global pioneers within the banking sector by adapting Ondato's unique SMS Signature solution to their business operations. Their goal was to make remote financial institution services available to a wider customer base, while maintaining the same level of security at the shortest possible processing time. The SMS Signature tool helps company clients effortlessly review and sign any electronic document in a matter of seconds. This allows new as well as existing users to open accounts, acquire loans, finalize agreements, and accept commercial offers through a simple text message. Ondato has facilitated Fjord Bank to achieve its desired goals, improve the overall client experience, reduce costs, save time, and meet all compliance regulations.

Achieved Results
