NEUDESIC

Mobile Application Development Services

Neudesic offers award-winning mobile expertise you need to strategize, design, develop, and deploy applications that your customers and employees will love. Whether it's phone, tablet, wearable, or web, we have you covered.

Mobile Assessment & Strategy

We help drive your mobile strategy by assessing current apps, envisioning new apps, and ensuring your organizational readiness to build and support applications on your mobile journey. Our services include:

- Evaluating current apps to measure performance and assessing the ability to scale, build-out new features, and automate testing and deployment process
- Envisioning new apps and developing feature lists to maximize ROI and user value
- Developing a mobile strategy and Center of Excellence to guide ongoing initiatives

Mobile Application Discovery

We work with your team to provide a step-by-step roadmap for streamlining delivery of your new mobile app. Our services include:

- Assessing and defining stakeholders, platforms, capabilities, and timelines for delivery
- Creating project schedules and implementation plans for your app and subsequent releases
- Offering a competitive analysis and presenting use cases that prioritize business needs and ROI
- Defining a tech roadmap, logical and physical architectures, and proof of concepts, as needed

Mobile Application Development

Our technical, UX, and industry experts deliver modern, intelligent apps that drive long term customer engagement. Our services include:

- Providing cross platform development expertise to accelerate your time-to-market while delivering native functionality for both iOS and Android users
- Leveraging Neudesic's user experience teams to create rich, immersive mobile applications that increase user engagement, downloads, and app ratings
- Offering strong competencies in Xamarin, React Native, Flutter, Swift, Kotlin and more
