iSMILE TECHNOLOGIES

AZURE READINESS ASSESSMENT

## Why Ismile for Azure Migration Readiness?

- Higher revenue options and opportunities from business-to-business
- Maximization of efficiency of production
- Clarity on TCO
- Effective prioritization
- Mapping of all the dependencies visually
- Reduced IT resources and data centre leading to low cost
- Simplified and faster hardware and software management

Deliverables

- Server Inventory Report
- Hardware and software attributes report
- Azure VM Migration Report
- Azure readiness assessment report
- Storage report
- Cost projections
- Application Readiness Report,(it includes PaaS compatibility details and considerations for remediation)

AZURE MIGRATION READINESS (5 Weeks)

- Recording and collecting data about the inventory of server infrastructure
- Analyzing and collecting the metrics for workload utilization
- Segregating the workloads like identifying the non-production workloads
- Form the Azure VM sizing, identify opportunities for modernization and undertake cost feasibility analysis alongwith setting cost models for migration
- Choose the application candidate for migration
- Use application dependencies for segmenting and categorizing workloads
- Segment out workloads based on application dependencies
- Assess cloud migration readiness at application level
- Assess cost, time, money and efforts involved in application modernization
