

Invitation to Register for App in a Day

Infosys cordially invites You to the App in a Day Program being held in from 9 AM to 5 PM. The program is intended for Program Managers, Product Owners, Enterprise Architects, IT Directors, and technology decision makers to get a hands on experience on Microsoft Power Platform- A low code app platform from Microsoft that comprises of PowerApps, Power Automate and Power BI, that works seamlessly with office tools and other enterprise applications to build intuitive business apps and insights with minimal to low code and gives you faster time to market advantage.

The program has witnessed an overwhelming response in 2019, with 500+ customers from across 20 industries experiencing agile app building in a day, with experts from Infosys and Microsoft helping their employees build applications, share their industry experiences, and facilitate them to unleash possibilities of the low code platform.

About PowerApps & App in Day

Employees in today's digital workplace use an average of 3 different devices in their daily routine, which is placing an increasing amount of pressure on IT to develop multi form factor business apps in shorter time frame. The Demand for business apps is growing **5x** faster than IT departments can deliver, with an ever growing challenge of application adoption.

To address this gap, Microsoft has introduced "**PowerApps**", a simplified platform for building and distribution of Enterprise Apps reducing time to market from weeks or months to days and empowering a new category of app creators – citizen developers.

Objectives of the App in a Day (AIAD) Programme

Hands-On workshop for Power Users and Citizen Developers like you , covering the breadth of PowerApps, Power Automate, Power BI and CDS for application capabilities.

Objectives of the program:

- Helping you understand the value of PowerApps, Power Automate, Power BI and CDS for applications
- Facilitating you to build an experience to use the platform and help you to be an advocate within your organization for the low code platform
- Recognizing the importance of an IT partner for a strong foundation and to continue building a working relationship with your organization for building and rolling out enterprise scale apps
- Helping you with the next steps to enable the low code platform in your organization

Know your AIAD program Partner – Infosys

In our journey of over 36 years, we have catalyzed some of the major changes that have led to India's emergence as the global destination for software services talent. We pioneered the Global Delivery Model and became the first IT Company from India to be listed on NASDAQ. We navigate our clients from where they are to where they aspire to be. In today's fast-paced world, we are 'Taking enterprises to the Other Side'.

At the venue

- Please plan to reach the venue at least 30-45 Minutes before the event, as there are **check-in** formalities to be completed
- Refreshments and Lunch will be provided at the venue as you work through your day building an app
- Please help to bring your own laptops, as this will be a hands on session
- For users whose Corporate laptops have single sign on to login to existing Dynamics 365 , please help to bring a personal laptop, as you will have to have admin privileges to access Dynamics 365 instance for certain lab session demonstrations

For any further assistance in trial instance creation, or about the event, please do feel write to us at AIADsupport@infosys.com and we will be happy to assist you.
