

Autoscaling Cloud-Native Applications Assessment

Building autoscaling from the ground up

Design for Scale

Allow platform to scale

Re-use, not re-invent

Protect

Efficiency

Save the environment,
use only what you need

Avoid burning money,
optimize runtime cost

Insights

Avoid autoscaling loops

Build dashboards

Get Notified

Measure

Adapt

Autoscaling is a journey

Design for change

What we will focus on

Azure
Serverless

Azure PaaS

Containers

Kubernetes

Stay In Control

Consistency

Unified autoscaling strategy across Azure services (*)

Cost

Don't lose control over cost

Insights

Understand how your platform is scaling

Serverless • PaaS • Containers • Kubernetes

Autoscaling

(*) Depending on Azure services being used

Get Started with an Assessment

What we will do

- | Application(s) & Platform review
- | Architecture review
- | Kubernetes review
- | Autoscaling strategy review

What you will get

- | Improvement areas
- | Roadmap
