# EMAIL MIGRATIONS MADE SIMPLE

**forsyte**
MIGRATION NINJA

Migrate mailboxes and emails to Office 365 and Exchange with near-zero downtime.

## What is MigrationNinja?

### Migrate Seamlessly and Securely

Increase the efficiency and security of your migration while cutting costs per user with MigrationNinja, Forsyte's innovative migration tool built and hosted in Azure.

Sensitive data requires extensive security buffers and it is critical that your data remain highly secured throughout the duration of your migration.

MigrationNinja offers rapid, successful, and secure email migrations across complex infrastructures. No amount of data is too large for the power of MigrationNinja.

Decrease migration times with the proven technology that quickly migrates large volumes of data in shorter amounts of time.

*"Executing an email migration to Office 365 is complex. It's not the migration per se, but re-creating the ecosystem of integrations, security and archiving solutions." - Gartner Research*

## Migrate Mailboxes with Ease

MigrationNinja was built to efficiently migrate mailboxes and speed up the time commitment generally associated with any size mail migration. Using Azure Datacenter Security, MigrationNinja passes data through Azure as a copy to ensure that no data is ever deleted from a tenant for any reason.

Recommended as a tool for those familiar with migrations and staffed to work on a full-scale email migration project, MigrationNinja provides optimal speed and efficiency to successfully run email migrations of all scopes and sizes.
As an added option, Forsyte offers Migration Professional Services to wrap into any MigrationNinja email migration, with a dedicated team of migration experts experienced in meticulous planning and delivery.

**Secure migrations backed by the Azure Datacenter Security.**

**Data is passed through Microsoft Azure for advanced security.**

**Data is copied & will not be deleted from your tenant for any reason.**
