

Alfabet FastLane Cloud Assessment

Getting to the cloud faster and more reliably

Fact sheet

Accelerate your cloud migration journey. Alfabet FastLane makes it easy with ready to-use-reports providing you answers to critical business questions relevant for your cloud migration initiatives.

Get instant answers on your cloud migration journey

Migrating to the cloud can be a complex and overloading challenge, not knowing what to focus on and what impacts the migration entails. To speed up this decision and planning process Alfabet FastLane Cloud Assessment helps you to identify cloud candidates and decide on your migration strategy (Retire, Retain, Rehost, Refactor, Rearchitect, Rebuild). It's a pre-configured SaaS solution, is easy to use, at low cost and risk.

Key benefits

- Fast setup—based on SaaS model
- Ready-to-go reports and dashboards for quick cloud assessment and cloud impact analysis
- Efficient planning with predefined portfolio analysis to determine cloud strategy and roadmap
- Optimized cloud migration decisions by comparing focus areas with actual migration strategy
- Expedited time-to-value with focusing on the right cloud migration candidates based on built-in application assessment framework
- Improved agility and increased project success rate through a clear understanding of impacts and dependencies
- Understand your current architecture while highlighting technical obsolescence and lifecycle conflicts
- Significantly accelerated IT portfolio cloud migration

Get in the FastLane!

Cloud migration

- What are our cloud focus areas?
- What is our cloud migration strategy?
- What is the technical obsolescence impact?
- What is our cloud footprint?

Governance

- Who is responsible for our assets?
- What should we be focusing on?
- Who owns which applications?

Transparency

- What is our application portfolio?
- Which process areas require most IT support?
- What are our architectural dependencies?
- Where do we have functional redundancies?
- What is our technical debt?
- Who are our vendors?
- What is our Business-IT alignment?

Rationalization

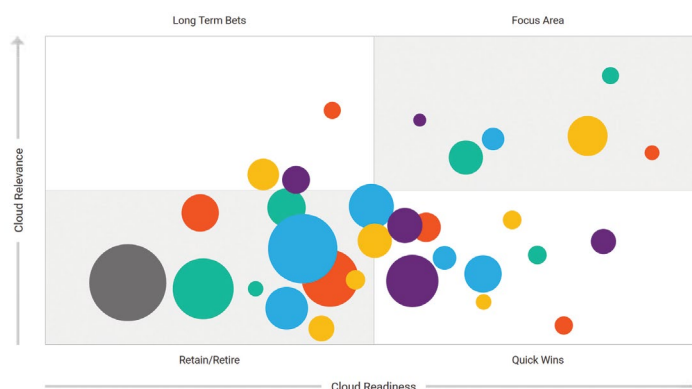

- What are our cost drivers?
- What are our investment/retirement candidates?
- What is the status of our rationalization plan?

Roadmapping

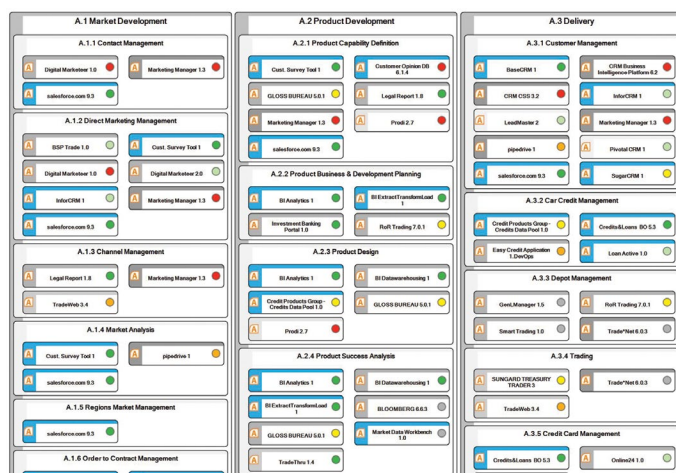

- What is our landscape?
- What is our target architecture?
- What is our roadmap?

Risk

- Where do we use sensitive data?
- What is our security score?
- What is the business impact on IT failure?

Preconfigured dashboards show you where to focus your cloud migration efforts

The cloud migration strategy board gives you a real-time view of the required actions within your cloud portfolio

Features

Evaluate your cloud focus areas

Get an overview of your cloud migration strategies, to make better decisions based on the system recommendations of your cloud focus areas. Gauge your cloud readiness and relevance and adopt a topdown, bottom-up approach to migrate the most important applications within your portfolio.

Define your cloud migration strategy

Understand your current strategies for your application portfolio. Analyze your strategy board by each focus area and understand application responsibilities and provided capabilities. Rationalize your migration strategy by the cloud focus areas.

Find out the impact of technical obsolescence

Realize the lifecycle of applications as well as the components that these applications are using to assess your technical debt. Plan your cloud application portfolio and minimize lifecycle conflicts amongst technical components supporting your cloud applications.

Discover your current cloud footprint

Visualize your cloud application landscape by business owner or capability. Understand your AS-IS and TO-BE cloud landscapes at any given point in time. Create your own cloud transformation strategy by analyzing your cloud portfolio performance based on application KPIs.
