

Legacy App Azure Migrations: 8 Week Assessment & Design

Design and migrate core business applications to Azure Cloud Services

A reported 70% of organizations plan to move business-critical applications to the cloud in the next 2 years. Citing high operational costs, end-of-life software, and dated user interfaces, yet these same organizations are overwhelmed with identifying a clear path to the cloud.

Canviz's Azure Cloud Migration Services bring new life to legacy applications. Using industry recognized experts, we help navigate the confusion of cloud options. After thoroughly investigating your legacy apps, we deliver a roadmap for your Azure cloud journey. Additionally, we design a modern user experience (UX) leveraging the latest usability and distributed workforce techniques. The end results of this engagement include a modern cloud design and a detailed plan to achieve your business goals.

Engagement Deliverables

- Architecture research and design summary
- Azure Cloud Options Matrix : time estimates, costs, pros/cons, feasibility
- High-Level Future State Architecture Specification
- Proposed Project Plan
- UX Mock-ups
