# Implementing Microsoft's Enterprise Mobility + Security

What is Enterprise Mobility + Security?

Imagine the tools your business needs to be secure, compliant, mobile and productive all packed into one affordable suite. iCorps Technologies is deploying Microsoft's Enterprise Mobility + Security (EMS) for many businesses looking to protect corporate data, streamline device management, monitor security threats and ultimately, boost productivity for all employees. Our team of expert IT consultants can help you implement these tools to ensure your employees can work anywhere, anytime, from any device without compromising company data and your business.

Cloud

On-Premises
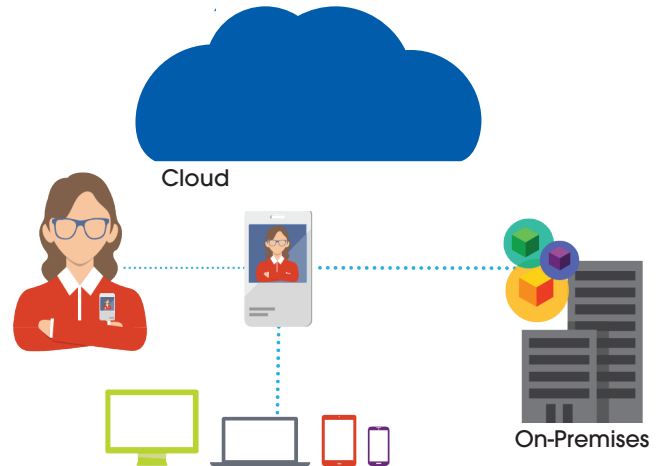

What Technology Features are Included in EMS?

Patches, updates and security:
- ✓ Inventory management of all devices
- ✓ Ensure the latest patches and software updates are quickly installed
- ✓ Centrally deploy applications and updates to all devices for continuity and security
- ✓ Wipe company data and applications in the event of a stolen or missing device

Microsoft Intune

Data Protection
- ✓ Information protection in the cloud or in a hybrid model with your existing on-premises infrastructure
- ✓ Secure sensitive data and files across multiple device platforms (i.e. PC, Mac, Android)
- ✓ Option to control your own encryption

Azure Rights Management

Access Management
- ✓ Single Sign-On: use one password to securely access over 2,500 software apps
- ✓ Multi-factor authentication: boost security by protecting your devices and applications with several access layers such as password and phone verification code
- ✓ Self-service password resets: Reduce support needs by enabling your users to securely reset their own passwords

Identity & Access Management
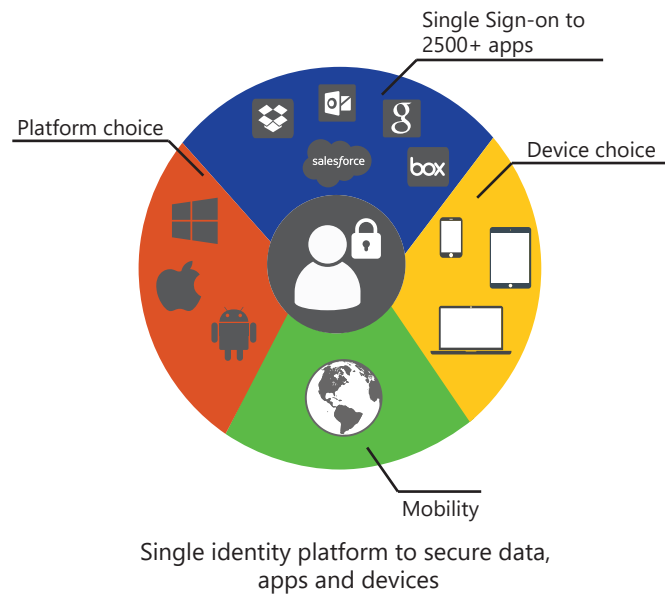

Cyber Threat Intelligence
- ✓ Analyzes all Active Directory traffic
- ✓ Learns and profiles behaviors of users, devices and resources in order to detect anomalies in those behavior and raise security red flags
- ✓ Provides actionable information on a potential attack

Advanced Threat Protection Analytics

Why Enterprise Mobility + Security?

Enterprise Mobility + Security is simple to set up, always up to date, and connects to your existing cloud and/or on-premises resources. EMS increases productivity by securing your environment anytime, anywhere. It is the only solution designed to protect your users, email, files and applications while being 50% less than the cost of buying standalone solutions from other vendors. You even get data protection support for Android, iOS, Mac OS, Windows and Windows mobile devices including over 2,500 popular Software-as-a-Service applications.
