

MESSAGEOPS

AZURE GLIDEPATH GOVERNANCE SERVICES

WHERE BUSINESS PROCESS UNIFIES WITH CLOUD OPERATIONS

MessageOps developed our Azure® GlidePath™ services for governance to help businesses take the complexities out of creating a governance program. Our services are designed for companies that recognize the need for governance, but have not yet developed a fully mature Azure governance program. Companies looking to keep risk at acceptable levels, protect customer data, maintain availability of systems and services, and have a consistent policy and audit compliance are the key drivers for IT governance.

OUR METHODOLOGY

Our Azure GlidePath services for governance are based 100% on Microsoft's Azure Cloud Adoption Best Practice Framework that sets the foundation for the Five Disciplines of Cloud Governance, which is the most valuable – and often overlooked – aspect of a successful Azure Cloud program:

1. Cost Management
2. Security Baseline Resource
3. Consistency
4. Identity Baseline
5. Deployment Acceleration

GOVERNANCE SERVICES

Our services will help you achieve your strategic security and availability objectives, all while meeting compliance requirements, and controlling and optimizing your cloud spend. We will work with your team to:

- Establish Azure management groups
- Create role-based access controls
- Create Azure policies
- Create Azure blueprints
- Create Azure workflows

WHY MESSAGEOPS

MessageOps is uniquely qualified to help with all aspects of your Azure deployment and ongoing administration. As part of our extensive background with Microsoft® and the Azure platform, MessageOps:

- Has deep Azure services delivery experience (we have been working with Azure since its beginning)
- Has experience deploying thousands of Azure workloads
- Has migrated over 2.4 million users to Azure Active Directory
- Delivers comprehensive training on most important Azure features
- Provides you with the tools to monitor, allocate, and optimize your cloud costs so you can accelerate future investment with confidence
- Helps developers and testers quickly create environments in Azure while minimizing waste and controlling cost
- Is a recipient of the Microsoft Azure Partner of the Year Award
