

AI Tele-Rehab & RPM Solution

Comprehensive Care for Musculoskeletal, Cardiology & COVID-19 Long Hauler patients.

1

CLINICALLY VALIDATED DIGITAL SOLUTIONS

Proven per/patient savings, improved outcomes, patient satisfaction & optimized care.

2

TARGET CUSTOMERS & CENTERS OF CARE

Solutions for hospitals, speciality clinics, rehab centers, LTC & home care.

3

ENHANCED WITH MICROSOFT AZURE

Azure Cloud, ML, Active Directory, Cognitive Services & Azure Kinect Camera SDK.

Healthcare – Fixed Costs & Post COVID-19 Challenges

1. Financial impact of \$202.6 billion in losses for American hospitals
2. Lengthy surgical wait times lead to poor health outcomes for Musculoskeletal & Cardiology patients.
3. Bundled care payment models means fixed costs for health services.
4. Post-COVID-19 patients – will have high needs for physical & cognitive rehabilitation (long-COVID).

CHALLENGES

Greater demand, fixed costs, plus under-funding were highlighted by the COVID-19 pandemic.

IDEAL SOLUTION

Supports remote care via Virtual, Diagnostic, Tele-rehab solutions.
Drives fewer in-person Pre-op/Post-op visits.

DESIRED OUTCOMES

Quality care to patients, addresses current & future gaps in care, while delivering value.
