Reduce Overhead Costs And Increase Efficiency

According to Accenture Strategy’s recent research, 75% of customers prefer short response times and 55% of Customers want consistency and accuracy of information across all communications channels.

On any given day in your enterprise, your contact center handles massive volume and repetitive queries that people ask about your product or service. Automating such queries to deliver answers using online chat and voice-enabled solutions delivers answers up to 6x faster and at a fraction of the cost of staffing, training, and managing your contact center. With Zammo, your staff can now be utilized to handle more in-depth needs that your customers may have.

The world’s only voice-first conversational AI solution for enterprises with a no-code setup.

$8 Trillion
Disposable income of disabled consumers

Social Responsibility Through Accessibility

Using Voice to improve accessibility will be a major initiative in 2021 and beyond. Compliance mandates and initiatives related to diversity and inclusion (D&I) will drive enterprise innovation to help people with disabilities. Remember, these people become loyal customers when they are given tools to transact with enterprises like yours; including potentially seeking employment with your organization.

Easy to use and fast to deploy

We have virtually eliminated the need for in-depth IT involvement by providing a feature-rich platform that almost any user can navigate, regardless of their technical background. Business users from several departments can collaborate while drafting and editing new or existing content, ensuring accuracy and approval by multiple departments before going live. Typically, enterprises convert, optimize, and publish their existing content into conversational content within 1 DAY of getting started.

1.83 Billion
Worldwide Voice Technology Users

In the very near future, having a voice presence will be as important as having a website...only with no more typing to search for your enterprise!

Enterprise impact with Zammo

As a global leader in Conversational AI, Zammo is quickly emerging as the leading expert in the field. We have become strategic partners for enterprises as they transform their communications and branding through voice assistants, best-in-class Chatbots, and Telephony/IVR (interactive voice recognition).

Control Costs
Zammo’s AI-powered tools deliver answers to routine and repetitive questions up to 6X faster and at 90% cost savings compared to staffing, training, and managing your contact center.

Grow Revenue
Enterprises that link products and service chatbot questions with information and resources to upsell or cross sell will experience a significant increase in sales revenue.

Increase Reach
41% of adults use voice search at least once per day. Ensuring that your brand can be easily found is critical to reaching more customers as voice grows in popularity.

$11 Billion
Est. Support Costs Saved By 2025

Powered by Microsoft Azure, our cloud-based platform is easy-to-use, reasonably priced, and enables non-IT professionals to create and deploy informational content within a day. Zammo handles publishing your content as a chatbot on your website, conversationally on voice apps like Amazon Alexa, Google Assistant or other channels like SMS (text message), Microsoft Teams, Facebook Messenger and others.
