

Orchestrate business processes with Cora SeSequence

Create dynamic workflows that transform customer experiences, support profitable growth, improve cost efficiency, and enhance business agility

What is Cora SeSequence?

Cora SeSequence is a cloud-based intelligent business process management suite (iBPMS) that allows your organization to design automated, human, and system-centric workflows to replace manual processes. It gives you complete data visibility, management controls, and the ability to continually improve processes.

Because Cora SeSequence is a Microsoft Azure iBPMS, it can rapidly integrate with workflows that rely on Microsoft products including Dynamics, Power Platform, SharePoint, and more. Cora SeSequence is also accessible across a range of devices so that you can orchestrate processes anywhere and anytime.

What are the benefits of Cora SeSequence?

Drives process innovation

Supports continual system optimization

Leads to improved productivity

Delivers a faster time to market

Reduces transactional costs

Achieve digital transformation in any industry

Every industry will have a use case for Cora SeQuence. In manufacturing, you can orchestrate end-to-end processes and visualize vendor relationships. In insurance, you can transform data processing to build business agility. We'll help you discover the benefits of Cora SeQuence for your business.

Reimagine every customer experience

Cora SeQuence can review, redesign, and improve every customer journey. This gives your organization the ability to react quickly to changing market conditions and customer demand to gain a competitive edge. You can also make sure your employees stay productive and support customers effectively by continuously defining, monitoring, and optimizing processes.

Reduce transaction costs to achieve ROI

When you streamline processes, you'll be spending money wisely. Cora SeQuence can reduce labor costs, create a centralized source of data to minimize processing time, and optimize the cost of transactions with intelligent work allocation and predictive analytics.

Cora SeQuence is user-friendly, flexible, and easy to configure. It provides visibility to our clients to view their case status online. It ensures we give a better service to our clients.
