

FEDERATED GOVERNANCE

The Next Generation of Information Governance

ONE PLATFORM, ALL YOUR CONTENT SOURCES

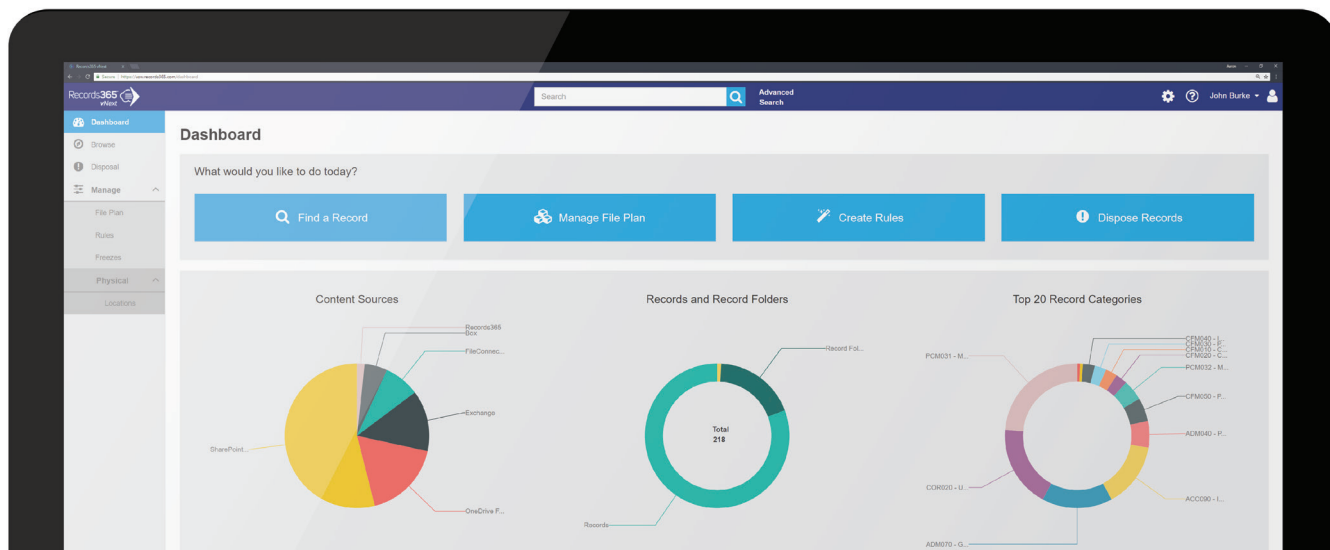

Records365 brings hassle-free compliance to content stored in a variety of sources. By managing content without cumbersome manual processes that do not interfere with the daily workflow of your end users.

Unlike traditional records management systems, Records365 is a modern records and information management solution. We help organizations manage their regulatory, legal, and information governance requirements for electronic and physical content. Records365 federates a variety of content sources, including Office 365, file shares, Box, physical records, SharePoint, Dropbox, Salesforce, and more.

- ✓ Maximize value from content in a compliant and secure manner.
- ✓ Provide users with high-quality data that is consistent and easily accessible.
- ✓ Enable greater productivity for end users by allowing them to use their preferred tools.

+more through the connector framework
