Maintaining industrial assets requires maintenance professionals with specialized expertise. While that expertise exists in some areas, it may lack in others. The industry-wide shortage of maintenance technicians doesn't help matters either.

You need a new approach to industrial asset maintenance that looks at the industrial repair puzzle differently and empowers your team.

## SOLUTION

## UPTAKE PMS - ACCESS THE WORLD'S LARGEST INDUSTRIAL EQUIPMENT KNOWLEDGE BASE

Uptake PMs is how you engage with Uptake's Asset Strategy Library<sup>®</sup> (ASL<sup>®</sup>), the world's largest database of industrial equipment types, failure modes, and maintenance strategies. Your maintenance team opens Uptake PMs to explore, purchase, and download equipment strategies with step-by-step instructions from the ASL. It's as easy as downloading a .CSV file and a quick upload of the new PM strategy to a EAM/CMMS maintenance system.

## OUTCOMES

## ASL. BY THE NUMBERS

800+

critical asset types

5K+

preventative maintenance tasks

58K+

failure modes

32K+

years of industry experience

### USING UPTAKE PMS, YOU CAN:

- Reduce maintenance costs by up to 20%
- Improve reliability by up to 15%
- Achieve 75% faster return than traditional RCM programs
- Reduce technician labor hours by up to 37%

## EMPOWER YOUR TEAM AND DELIVER PROVEN PM STRATEGIES

By using Uptake PMs to access the ASL, you'll see asset reliability go up while maintenance costs go down. Deploying PMs strategies is also faster and more cost-effective. It's a new approach to industrial asset maintenance that changes everything.
