The Microsoft logo, consisting of four colored squares (red, green, blue, yellow) arranged in a 2x2 grid, with the word "Microsoft" in a small, grey, sans-serif font below it.

West Coast Paper

- WCP is a local wholesale provider of fine paper, envelopes, packaging supplies, janitorial and facility supplies, food service supplies, and equipment integration solutions. Family owned since 1930.
- As a result of the Azure Data Backup Assessment, WCP found that leveraging Azure cloud storage could provide the advantage of the scalable, accessible, and secure benefits of Azure cloud storage alleviating some short-term concerns, as well as, positioning for future growth and needs.

By utilizing Azure cloud object storage, Sirius can help WCP set up a cloud library within the data protection solution. This cloud library could be leveraged by all storage policies to start storing data.

To help alleviate the challenge of maintaining the current, traditional methodologies, selecting an appropriate data protection solution that leverages Azure cloud storage for some of the mid-term retention data, all of the long-term retention data and all of the secondary offsite copies is advised.

Some traditional methodologies, utilizing LTO tape technology for all backup copies and retentions, for example, pose potential challenges to WCP from a cost, growth, complexity, resiliency or security perspective.
