

# Find Out if Your Legacy System is Ready for Cloud-Migration or Needs Modernisation

Ballard Chalmers' Azure migration assessment for custom applications

We are one of the UK's leading [custom software development](#) and integration companies, specialising in Microsoft Azure. We have worked with countless clients and their legacy systems, getting them cloud-ready or modernising them and migrating the applications to Azure.

## WHAT WE OFFER

Ballard Chalmers will assess your application's potential for cloud migration and advise on the relative benefits of moving the legacy system versus modernization.

We will then advise on what will be required to make the application cloud-ready and provide an estimated time and cost budget to move to Azure and provide documentation.

With years of experience working with custom .NET and SQL applications and a thorough understanding of Microsoft Azure, we are well placed to help you fully leverage all of the Azure cloud benefits.

## WHAT OUR CUSTOMERS ARE SAYING

"Moving our Global ERP System from an on-premises solution to a cloud hybrid solution presented some technical challenges during design and implementation phases. Ballard Chalmers consultants provided the skills and expertise needed to successfully complete the project. We are extremely happy with the end result and the service provided by Ballard Chalmers." – Head of IT EMEA and Global Networks, Imagination

# Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

## WHY AZURE

### BE FUTURE-READY

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve. Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

### BUILD ON YOUR TERMS

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

### OPERATE HYBRID SEAMLESSLY

On-premises, in the cloud, and at the edge - we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90% of enterprises globally.

### TRUST YOUR CLOUD

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.
