

Cloud Adoption Framework – Strategy, Plan & Ready - Workshop

As an offering helps in envisioning the strategy, validating the plan, and establishing a cloud foundation

The Cloud Adoption Framework workshop helps customers get a complete grip on transition to cloud. This aids in establishing a learning path and outlining the Azure cloud environment. The assessed outcome helps in orchestrating a cloud foundation that aligns with the business goals.

Cloud Adoption Framework – Strategy Plan & Ready Workshop Offering

Our Cloud Adoption Framework workshop offering aids in documenting the strategy, which helps the stakeholders in understanding the business outcomes. The planning phase converts the strategy into action while establishing the cloud foundation. Our CAF workshop explores the below-mentioned aspects

Define Strategy

- Outlining the motivations, while engaging the stakeholders as well
- Developing a business justification that supports your outcomes
- Leveraging business and technical requirements to align with the project objectives

Plan

- Rationalizing the digital estate while identifying technological gaps and planning accordingly
- Aligning governance and best practices to mitigate risks
- Developing an adoption plan that aligns to the business strategy

Ready

- Adopting the Azure setup guide that helps in developing the blueprint
- Leveraging the CAF migrating landing zone for easy operations
- Employing the landing zone considerations that help in enhancing the blueprint template

The most favoured choice for the IT & Business Decision Makers

- Providing a roadmap for customers to realize the measurable business objectives on the cloud
- Aids customers in strategizing and planning accordingly while providing adequate support
