

Geminus Flow Intelligence

Digital Twin SaaS for Industrial Fluid Systems

COMPLETE PROCESS VISIBILITY WITHOUT ADDITIONAL SENSORS

- Access flows, pressures, temperatures, qualities, etc. anywhere, at any time
- Understand effects of system-component interactions on performance & energy

DETECTION & ROOT CAUSE WITHOUT HISTORICAL DATA

- Identify operating modes & interactions affecting equipment & process operation
- Assess energy-related inefficiencies and impacts in critical equipment

OPTIMIZED SYSTEM PERFORMANCE

- Virtually test process changes & equipment upgrades
- Tune control strategies in the presence of system interactions and variability
