

A New Dimension in Cloud Computing

Optimize business operations and organizational intelligence for greater results

The Unified Interface for the Modern Workplace.

OneVuex connects information and systems, generating greater productivity, increased security and lower IT/operational costs.

Increase Productivity with OneVuex

Businesses face many challenges finding, extracting, and sharing information from separate legacy and cloud systems, resulting in hours of wasted time, lost productivity, and ineffective decision making.

OneVuex is an out-of-the-box computing solution, built on the Azure and Office 365 platforms that unifies Microsoft and non-Microsoft applications, platforms, and cloud services in a single web interface. Users can easily find, access, manage and share related information, achieving 20% greater productivity with unmatched security.

Work Faster and Smarter

People want to work faster and smarter on the device of their choosing – free to create, access and share information no matter what it is or where it resides, trusting their systems are safe and secure.

- Easily connect and operate systems with greater power and better communication.
- Experience increases in efficiencies and productivity.
- Eliminate expensive migration and connectivity services and business disruptions.
- Experience integrated security across all systems and devices, extending cloud security to on-premises systems.

Power of Integration

- OneVuex's connectivity services allow data and the functionality of systems to flow freely.
- Stable connectivity, unaffected by updates with no disruptions.
- Total mobility for on-premises and cloud solutions on most devices.
- Secure collaboration for effective file sharing and team meetings.

Fits Every User

- Customized, adapting to each user's needs.
- Easy to use and eliminates most IT connectivity, migration and intervention services.
- Harness the power of Microsoft 365, SharePoint and SQL in a single interface without costly IT.
- Novice and savvy users are self-empowered, experiencing greater productivity.

Powerful System Search

- Finds everything connected to the system in a single search.
- No need to remember filenames or locations.
- Saves hours of unproductive time on multiple searches.
- Employees are more productive, focused on projects and customers.

Immediate Increase In Productivity

"OneVuex is the backbone of our operation. We immediately increased productivity by 20%...time that's now directed to members, generating more revenue. We're attracting new members and helping other chambers that are 10 times our size."

- Dan Bates, President and CEO
Greater Hamilton Chamber of Commerce

What Can My Business Achieve with OneVuex?

Code Integration

- Integrates applications (O365/ M365), platforms (SQL, Oracle, Share Point, etc.), and cloud services (Azure) for greater access and data flow without disruptions
- Organizes, manages, finds and relates information (documents, presentations, pdf files, media files, spreadsheets, emails, etc.)
- Extends stronger security to on-premises systems

Collaboration

- Integrated collaboration systems including IM, Teams, Broadcast, video, voice, file sharing
- Co-author documents in real-time, share files and conduct team meetings
- Natural language querying
- Translation for documents and video

Innovative IT

- The full power of SharePoint and SQL provided with an out-of-the-box solution without coding or costly IT
- Independent systems achieve full connectivity via OneVuex connectivity services, allowing data and functionality to flow freely
- IT can focus on projects that support customers and the business

Stream Analytics

- Information flows seamlessly in customized intelligence reports and dashboards, accessible on mobile devices
- Predictive analytics provide insights into progressive and future performance

Integrated Security

- Security protects all connected systems and devices
- Integrates Microsoft's Advanced Threats Protection in the cloud; Office 365 encrypts communications from the cloud to device; Windows10 protects the OS and devices
- OneVuex's Multiple Database Engine System eliminates a central reducing company-wide attacks

Data Migration

- OneVuex eliminates the need for expensive migration and connectivity services
- Easily drag & drop files, folders and emails, keeping the original formatting
- Migrate entire systems with full functionality in as little as 1-2 business days with no disruptions to operations

Why Choose OneVuex for Your Business?

If your business can achieve greater results, benefit from greater productivity and efficiencies, but: 1) Connecting data and systems (on-premises and cloud) is costly and difficult, inhibiting valuable insights; 2) Employees are challenged to collaborate and work on or off-site with ease; 3) Finding information is a challenge; 4) Security and rising IT costs are a concern...

Welcome to the Modern Workplace and experience what computing was meant to be.
