

Data Transformation with BIAdvantage™

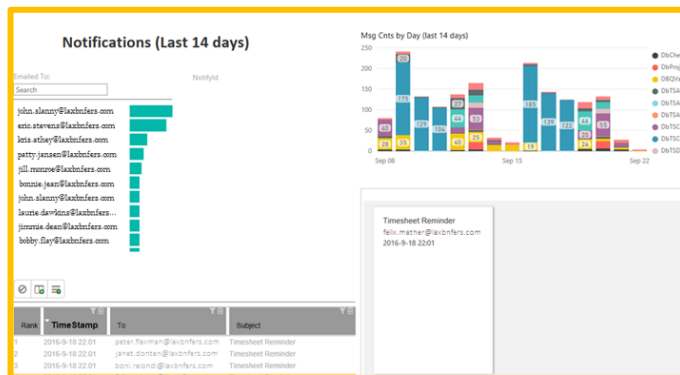

Increase data awareness and manage the accuracy and value of data you use everyday.

Connect systems and data sources to make data available in a single, seamless, trusted platform. Act on clear data insights. Make intelligent decisions with trusted data. Simplify and gain control of your business processes.

BIAdvantage™

BIAdvantage provides a single source of truth by bringing all data sources together into one centralized platform. This SaaS solution provides tactical business intelligence, business-rule driven data management and information delivery capabilities.

Why customers use BIAdvantage?

- Efficient Azure storage and significant reduction of Azure costs.
- Provides access to integrated data when and where its needed.
- Simple and cost effective – only stores data that’s needed.
- Dashboards monitor status of all connections and interactions.

Connect Data from Any System

- Integrated, trusted data on demand
- One cohesive system to identify issues, spot trends and gain deeper insights

Added functionality and improved financial data

Simple and cost-effective data storage

- Manages and reduces data storage costs – only stores the data you need
- Scalability, flexibility and security you can depend on

99.99% uptime in the Azure cloud

Accurate and Insightful Data

- Cross-platform, customized data analytics for use in standardized reporting formats
- Data delivers actionable insights and automated actions

Customers reported <1% error rate

Once the system (BIAdvantage) was put into production, our need for manual review of time entries dropped from 30% of submissions to less than 5% almost immediately. The system uses business rules to monitor adoption, compliance and performance without human intervention and errors are corrected by end-users within days instead of months.”
