

Challenges

Today any size business face a wide array of challenges ranging from increasing productivity to ensuring security.

Keeping technology up-to-date

Any tech refresh is time consuming, possibly business disrupting

Mobile, distributed workforce

Demands of mobile workforce requires strong collaboration capabilities

Protecting sensitive data

Rise in data breaches requires technology to protect the intentional or unintentional transmission of sensitive data

Cyber threats & phishing schemes

Preventing employees from being victims to phishing attacks and social engineered ransomware attacks

Fortevento Added Value Services

Perform Office 365 Secure Score Review

- Secure Score analyses your organization's security based on your regular activities and security settings in Office 365 and assigns a score.
- Using Secure Score helps increase your organization's security by encouraging you to use the built-in security features in Office 365

Train Users with Attack Simulator

- Three kinds of attack simulations are currently available:
 - Display name spear-phishing attack
 - Password-spray attack
 - Brute-force password attack

Deliver Shadow IT Assessment

- Gain Visibility – Discover cloud applications users are accessing
- Through control of applications use, policies can be developed
- By protecting against threats, define a baseline for application access

Microsoft 365 Business

An integrated solution bringing together best-in-class productivity tools, security and device management

Achieve more together

Create, connect, and collaborate with people, inside and outside your company.

Anywhere it matters

Enable your people to be productive anywhere, on their favourite devices.

Always-on security

Help protect your data and devices from one simple dashboard that is always up to date.

Simplified for business

Manage all your IT services in one place and minimize the work so you can focus on what matters: your business.
