

TSA 365

Features of the App:

- **Check in- Log in to the app with your department and tasks for the day.**
- **Facial Recognition: Scan your face to log yourself into the database so that your time stamp for the day's work can be recorded.**
- **Check-out- After finishing your tasks or if you want to take a temporary break, check out of the app, and you can check back in any time.**

Solving your employee scheduling issues with a single unified solution.

If you're managing a company where everybody clocks in at 8 and leaves at 5, you should have little cause for worry where scheduling employees is concerned. Since everyone works the same hours, staffing levels can be easily monitored, and it's highly unlikely that a staff member would be a no-show because he or she forgot about or wasn't aware of the schedule—and you would know if they aren't there.

For most staffing managers and shift supervisors of multi-shift, multiple-location businesses however, employee scheduling can be a nightmare because you not only have to consider the needs of the business (how many people are needed when, and skills) and how these needs impact on profitability.

Our mobile app solves and caters to all these problems with one solution that fits all your needs.

Hindrances of Employee Scheduling

1. Unusual Shift Rotations

Some businesses operate at odd hours and there are also those that are running round the clock. Making sure that shifts are properly manned takes a lot of effort because work hours per employee may change from day to day. Any misstep in the scheduling and you can be left with a shift that has too many or too few workers.

2. Last Minute Changes

Even the most well-planned schedules can be thrown into shambles if there are unexpected absences that crop up. But people falling ill or running into emergencies are a reality and hence, should be dealt with in the best manner possible. First and foremost, a replacement has to be found. Then, you also need be certain that the person picking up the shift isn't already doing overtime and/or isn't scheduled for work himself right before or after the "extra" duty hours.

3. Split Schedules

A split schedule is one where the employee doesn't fulfill his 8 hours of work in one sitting. For instance, he may be required to do the first half of his shift from 8 am to 12 noon, and then do the rest from 6 to 10 pm. As with uncommon shift rotations, split schedules can be a pain to organize because there are more details to consider and because the employees themselves may not be amenable to such arrangement. It's difficult to plan activities when they work such hours and they would need to commute more.

4. Varying Employee Rates

The labor cost per shift is a crucial factor that needs to be included in the planning of staff schedules. Some personnel may have higher rates than

Benefits of TSA 365

Our Timesheet Facial recognition systems works is an Android based Microsoft Facial Recognition system that works towards mitigating the problems of staff management.

The application is also secured with state-of-the-art security systems, so that there can be no can tamper or misuse the applications intent.

Our Exception handling code logic makes sure that every person scanned, is verified with highest level of precision and accuracy.

```
252 manager photoDescription( cell ) {  
253     document.getElementById( bigimageDesc ).innerHTML = description( page * 1 + currentImageSubting - 1 );  
254 }  
255 function updatePhotoDescription() {  
256     if ( descriptions.length > ( page * 1 ) + ( currentImageSubting - 1 ) ) {  
257         document.getElementById( bigimageDesc ).innerHTML = description( page * 1 + currentImageSubting - 1 );  
258     }  
259 }  
260 function updateAllImages() {  
261     var i = 1;  
262     while ( i < 10 ) {  
263         var elementId = 'foto' + i;  
264         var elementIdBig = 'bigimage' + i;  
265     }
```

Our Geo-locking feature can restrict the application to take attendance only when the device has reached a coverage area.

Being a cloud based, low data latency system, our software can be downloaded onto a mobile phone/Tablet taken to remote satellite location without any glitch

About Levtech Consulting

Levtech Consulting was established in 2009. Headquartered in Dubai, UAE, Levtech Consulting is a leading technology consulting firm, delivering digital transformation through best-of-breed business solutions, industry- specific consulting services and advanced technology capabilities.
