

# Platô 365 for Schools

# Build the education of new generations by joining **Education and Information Technology** in your school!

The universe of Distance Learning (DL) has already changed the way how schools relate to students in a learning environment. Considered as a way of innovation in the learning process, it's a teaching method in which the logic regarding the organization of a classroom may be completely transformed.

DL becomes an option to complement classroom teaching with attractive, didactic and interactive content, gamification, etc. These contents are essential to empower and bring teachers closer to students, and to improve the productivity and any other achievements in the classroom.

**The LD.BR 2015 (EAD.BR 2015) census suggests an average increase of 5% per year of investments in schools directed for distance learning, and that these institutions may have an average financial income increase of 9,98% and a 4,14% cost reduction.**

# IT Core solutions for Distance Learning in Cloud

The Platô 365 solution unites the best of the Moodle platform with Microsoft Office 365, hosted in the Microsoft Azure cloud, and allows an integrated and uncomplicated management of the collaboration and productivity tools, in the same environment of the teaching platform.

## With Platô 365 your school can:

- ✓ Retain students and conquer visibility and authority in technological innovation;
- ✓ Boost the learning effect, integrating students and teachers;
- ✓ Establish a culture of innovation in its institution;
- ✓ Develop the teaching staff, qualifying and updating methodologies linked to digital transformation;
- ✓ Optimize costs with resources, such as impressions and inputs;
- ✓ Attract the attention of new students that look for an innovative and quality education.

The Teaching Systems and Institutions recognize the need to provide even more dynamic and interactive learning experiences.

DL is a modality that makes it possible to offer a quality study in a flexible way, using advanced media resources, mainly from the Internet, and customized technological platforms for your teaching institution.

ITCore wants to help you ensure that the Distance Learning (DL) system of your school works in a stable and scalable customized platform, with high availability and personalization, so that your teachers and students may enjoy a productive and efficient collaborative experience.

**The Platô 365 solution also offers some facilities to make life easier as well as the IT processes:**

- ✓ Growth capacity as demand increases;
- ✓ Customization of the platform, which is stable and scalable;
- ✓ Cost reduction with physical structures for live classes.

The ITCORE solution for Distance Learning (DL) offers a customized infrastructure implementation service to ensure the continuity and stability of the environment, with the ideal growth capacity for your content and data needs.

Our performance is based on solid pillars, capable of providing the peace of mind necessary for you to keep focused on core business and administration of your academic institution.

Azure

# Get to know the **7 Steps** for the **DL Success** in the cloud

A solution that allows you to access the work tools in the same environment as the improvement platform.

# Platô 365 Features

## DEPLOY IN 1 CLICK

We automated the deploy of our solution for the creation of all the environment through 1 click. Don't waste more time with endless projects and make your DL available in just a few minutes

## BACKUP

We elevate the data and server protection of your institution. We provide specialized support for applications, servers and data backups, as well as geo-replication resources

## HIGH AVAILABILITY

We guarantee an infrastructure with High Availability and contractual SLA (Service Level Agreement), ensuring the continuity and stability of the services.

## UNLIMITED SUPPORT

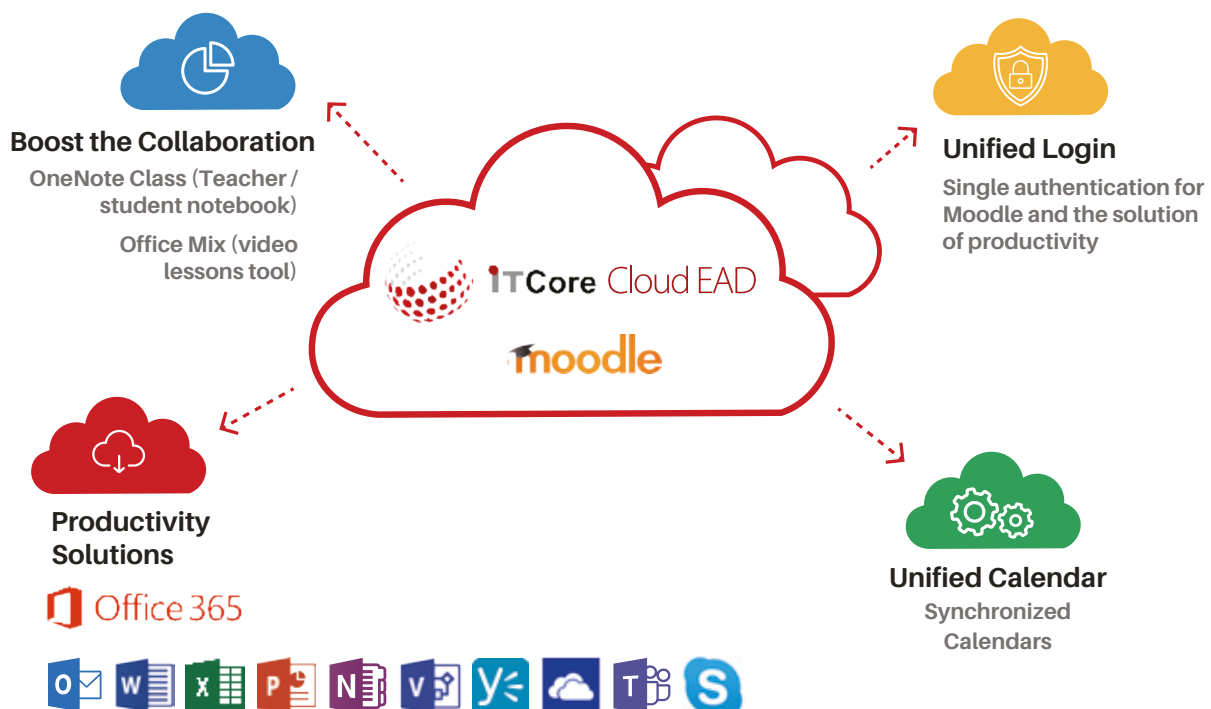

We provide an advanced and unlimited support, without restrictions regarding the number of calls or work hours, to all the infrastructure environment. We can include hours of support to Moodle if necessary.

## SCALABLE

We automate the growth capacity, whether for increased content or demand for simultaneous access in times of tests or new courses, without any impact to the continuity of school activities.

Increase the interaction and collaboration between the school, the teachers and students with **Microsoft Office 365**:

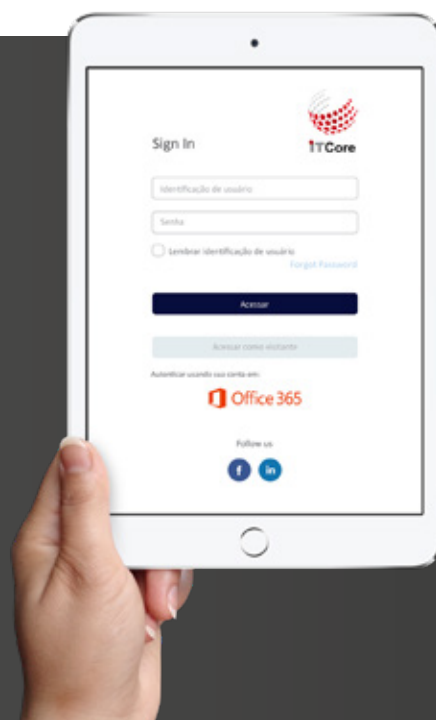

# More facilities of the **Platô 365** solution for your school

**INSTRUCTOR TRAINING:** ITCore empowers teachers to make the most of the LMS (Moodle) platform integrated with Microsoft learning tools, allowing the Digital Transformation of your school.

**INTEGRATED APP OF MICROSOFT O365:** The Platô 365 is an exclusive integrated app to your Office 365 Education.

**UNIFIED LOGIN:** Your school can provide a unique login for teachers and students, ensuring that they have access to the LMS (Moodle) solution, which can be integrated with the Microsoft Directory of users of your local network, facilitating access of unified login with student management platforms (ERP).

**UNIFIED CALENDAR:** Facilitate the communication of students and teacher with the calendar synchronization of your LMS (Moodle) classroom and Outlook (email).

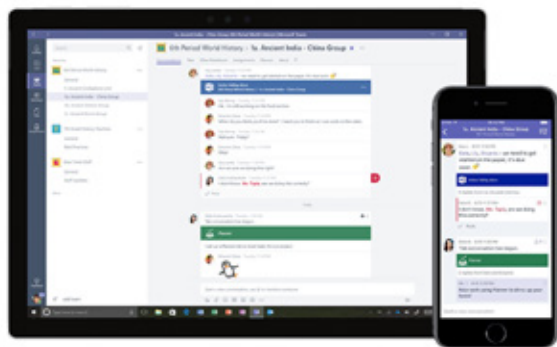

**CONNECTED AND MODERN TOOLS FOR A COLLABORATIVE INSTRUCTION:** The Microsoft Office 365 tools are integrated with the LD Moodle platform, allowing a greater interaction between teachers and students, mainly through the availability of resources such as:

### TEAMS – CREATE COLLABORATIVE CLASSROOMS

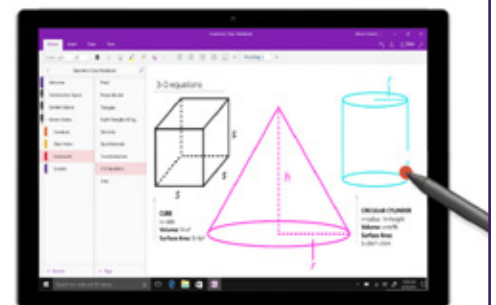

Manage the academic workflow with ease, including the voice of each student.

With Teams, maintain everything you need at your fingertips with the Class Notebook, Jobs, Office apps and files incorporated in each class. Give voice and choice to students, with rich conversations, video and playful content.

### ONENOTE: A MODERN NOTEPAD FOR ORGANIZATION AND COLLABORATION

Organize class materials and prepare tasks with texts written by hand, web content and even audio and video through your devices. Next, work with teachers and students in an easier way.

### SKYPE IN A LIVE CLASSROOM

Integrate Skype with your LMS (Moodle), and make your live classroom more dynamic and interactive

### CUSTOMIZED TO MEET YOUR NEEDS AND EVERYTHING IN A SAFER ENVIRONMENT

Teams provides the corporative safety features and conformity that you expect from Office 365, including eDiscovery and the legal retention of channels, chats and files. Manage how your school communicates with new controls designed for education, including deleting offensive posts or disabling the sound of class conversations.

**Platô 365** is the only  
solution in the market  
**100% integrated with**  
**Microsoft Office 365!**
