

staicy is a digital health data management platform. It allows you to connect the dots by **managing**, **analyzing**, **correlating** and **integrating** your health & research data.

staicy geo-storage

Manage and shape your health and research project with **made-to-measure modules**, hosted on Microsoft Azure.

Choose where to physically store your data with the **patented geo-storage** feature and abide with current data privacy regulations, such as the GDPR and HIPAA.

staicy EDC

Custom form content & layout according to your requirements.
Mini-navigator in the sidebar for a quick access to other forms/visit of selected patient.

The 'on the fly' **calculation** of system query facilitates the data entry.
The sidebar with integrated **query management** also serves as a communication tool.

Interactive and customized
visual data discovery capabilities
enhance advanced analytics, leading
to faster decisions.

The **custom report** function allow
you to create any report, when you
need this.

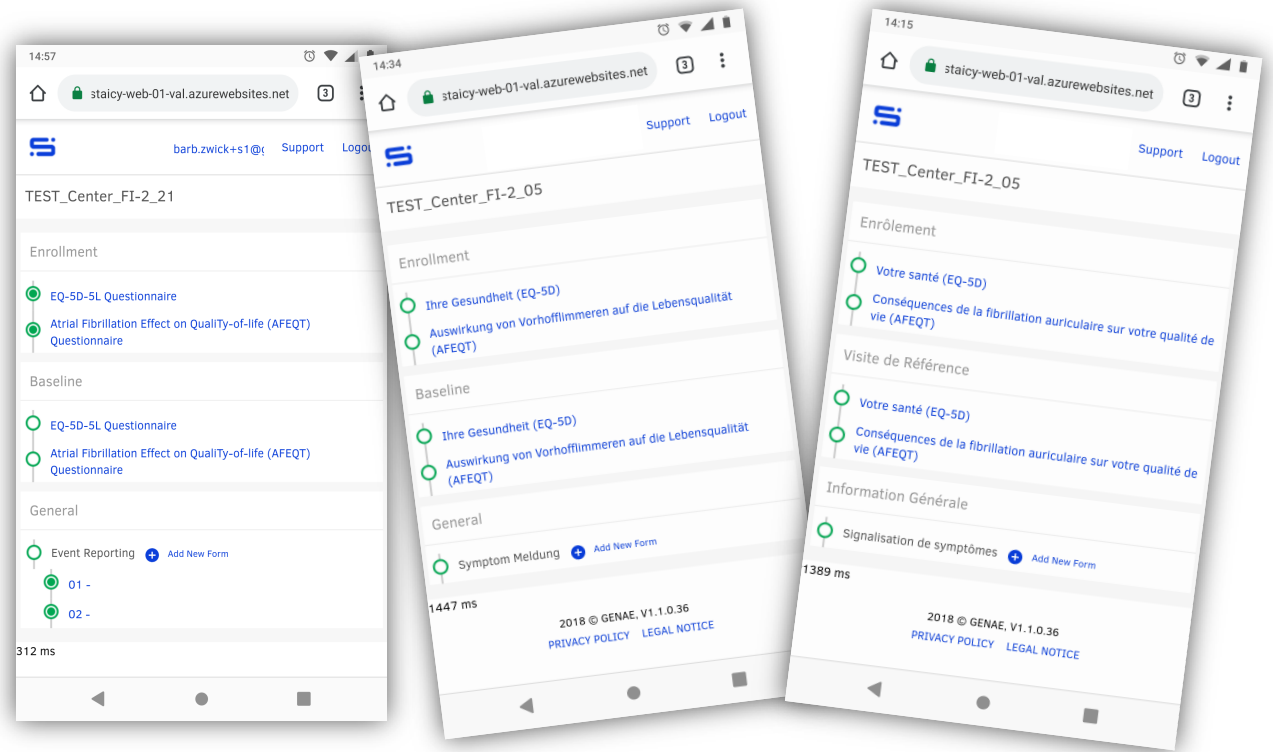

staicy Device Data Connect: example holtering device

Do you have a **device generating data**? Let us take care of the data processing, in a scalable manner, allowing you to focus on the important aspects: such as taking decisions based on this data.

staicy PROM

The patient reported outcome measurement tool allows you to **collect data directly from the involved subjects**. No need to wait until their next visit to their physician.

staicy Dashboard

Do you want to know what's going on with your data? Your staicy dashboards provides you with a **clear overview of your data**, at all times.
