EEC Services
Introducing Citrix on Azure + WVD: 1 Week POC

Technology is complex. Desktop-as-a-service is not.

Sam Soichet – Services Director
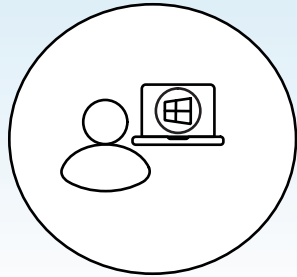

Angus Black – Practice Lead

EEC Services Citrix on Azure + WVD is part of our Desktop-as-a-Service offering which we have designed with industry led expertise to help organizations simplify and transform their Citrix environment with Microsoft Azure and our managed services.
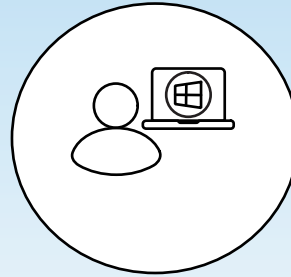

Citrix Managed Desktop Value Add
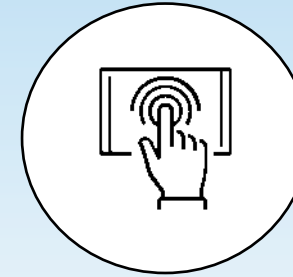

Microsoft WVD offering

Desktop offerings
- Single user desktops
- Multi-user desktops
- Application publishing.
- Microsoft Azure

Citrix Managed Desktop

Non-Domain joined
- Airgap machines for added security

- Easy pool management
- No Azure management for customers
- Advanced autoscaling

User Experience
- Microsoft Teams/ SfB integration
- Client and clientless
- Broadest peripheral support
- Universal printing
- Multiple PoPs around the world for local connection
- Four Azure regions worldwide
- Best protocol on the market

Management
- Image management
- Application layering
- User environment management – Addon
- Centralized console
- License management
- Analytics - Addon

Security
- SDWAN for secure connection to on-premises env.
- Integration with Okta
- App protection policies - Addon

Reference Architecture
Scenario 4: Citrix Virtual Apps on Azure

Citrix | Microsoft
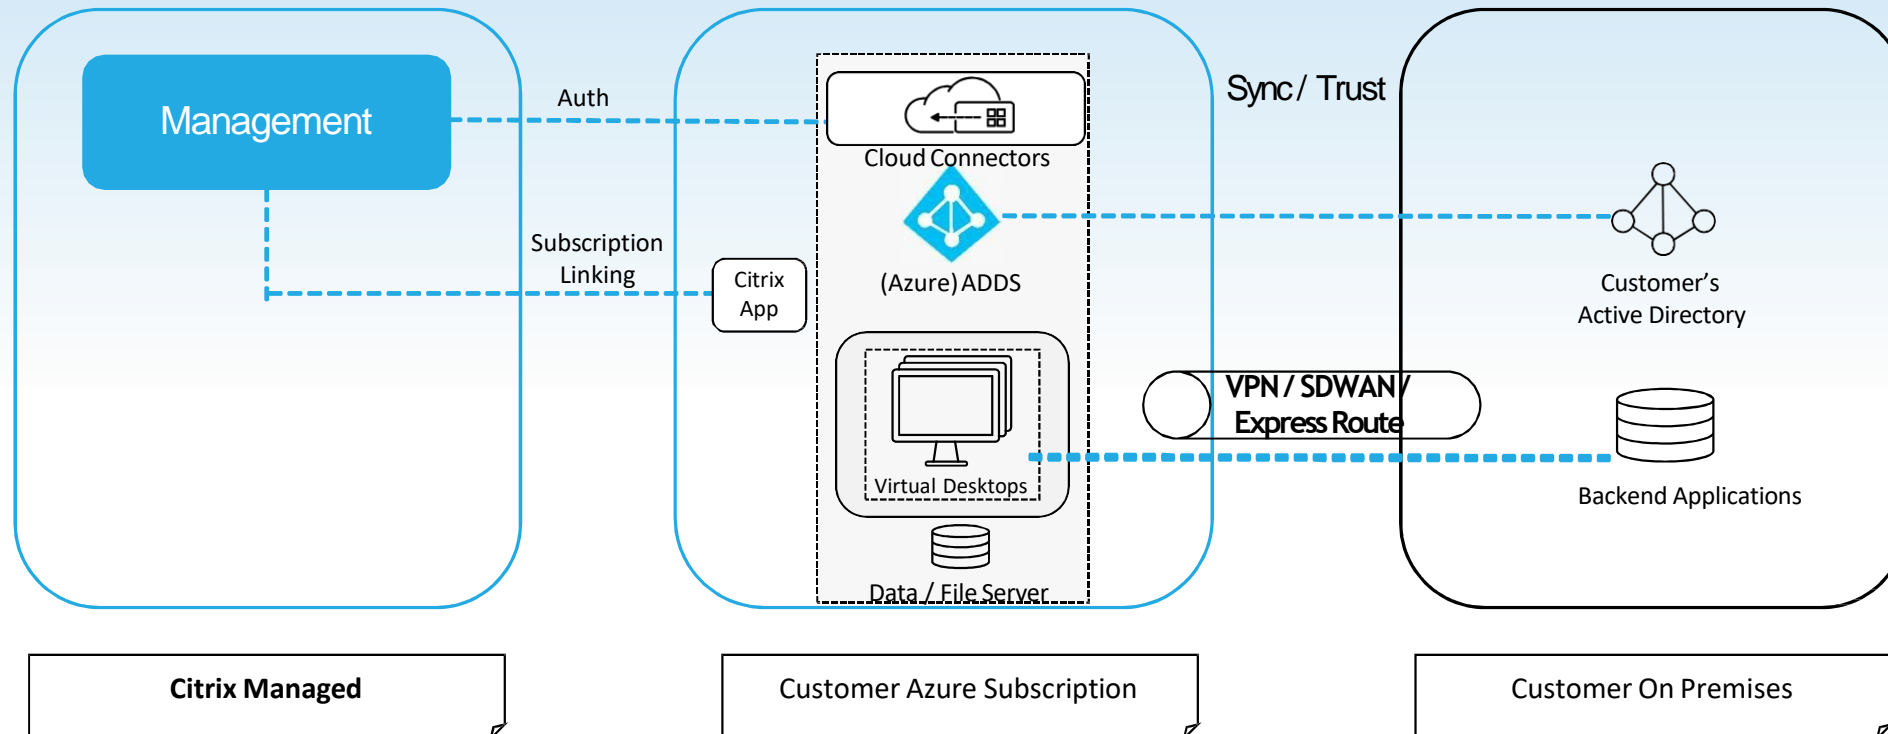

Top ten Citrix value adds to Windows Virtual Desktop

Hybrid cloud management

- Have a single interface for workloads on-premises or in Azure.*
- Migrate, capacity burst, or load balance.

*Windows 10 Enterprise support available only in Azure.

Citrix HDX technology

- Access any device, any connection.
- Optimize for Microsoft Teams, Skype, and more.

Performance and security analytics

- Gain visibility into user behavior and session responsiveness.
- Catch small issues before they become big ones.

Workspace environment management

- Optimize user density and logon performance.
- Improve user experience.
- Maximize IT spend value.

Session recording

- Record and play back sessions for issue diagnosis, compliance, and security audits.

Citrix app protection and watermarking

- Protect against accidental and malicious data leaks.
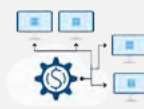

Advanced monitoring

- Use tools built for enterprise scale.
- Monitor health, user sessions, and more.

AutoScale

- Scale environments and cloud workloads.
- Leverage existing investments and ramp sessions into the cloud.

Citrix provisioning

- Simplify administration.
- Enhance reliability.
- Rapidly deploy at any scale.

Citrix app layering

- Access flexible technology.
- Enhance user experience.
- Leverage nonpersistent environments.
