

# Threat Protection Review

**SILVERSANDS**

Modern threats are increasingly complex and varied. Many organisations are missing available opportunities to protect data, services, and users.

SILVERSANDS

## Challenges

- Complex, changing modern threats.
- Organisations overwhelmed by threat notifications and monitoring.
- No time to become acquainted with all aspects of Microsoft Threat Protection.

- Statistics show intruder footholds lasting hundreds of days on average.
- IT departments increasingly resource and budget pressured to return results.
- Increasing data breach fines

## Ideal Solution

- An integrated service utilising intelligence and signals from across organisation.
- Reduces alert noise and focus on risks and business impact.
- Proves value of service to stakeholders.

- Simple workshop, analysis, report, handover format.
- Actionable output showing where immediate, gains can be made.

## Desired Outcomes

- Identify Microsoft solutions already available to your organisation.
- Receive actionable outcomes to secure your organisation.
- Gain understanding of the services and where to invest further time and resources.

- Gain insight into top services and configuration to deploy without diverting pressured resources.
- Enable short, mid, and long term planning to secure your organisation.

## Discover what you don't know with Microsoft Cloud App Security (MCAS) experts Silversands
