# What we do

## Data Platform

Cloud Data Warehousing

Big data

Optimization of platform costs

Assisting the client in defining a vision and a ROI

Microsoft  
Partner

Gold Data Analytics  
Gold Data Platform  
Gold Cloud Platform  
Gold Application Integration  
Silver Project and Portfolio Management

Power BI

 Azure

## Artificial Intelligence

End2end AI solutions

ML, DL, NLP & Computer Vision

IoT

Office 365

 Microsoft  
SQL Server

## Business Analytics

Business Analysis and KPI definition

Dashboarding & Visualization

Adoption, change management and training

### Microsoft events we organize

Analytics in a day

Database in a day

Dashboard in a day

Paginated Reports in a Day

Admin in a Day

From Tableau to Power BI

AI in a Day

Power BI User Group

## Assessment description

Price: 16.000 CHF\*

Number of participants: -

Available languages: ENG, FRA, ESP

My Data Works partners (MDW) will provide you a clear overview of modern data warehousing pattern in Azure, giving you an understanding of best practices on how to load and prepare data for analysis in the cloud.

You will learn about the options and benefits of implementing a modern data warehouse in Azure. We offer a free 1-hour consultation to understand your needs and the goals you would like to achieve. We will state together the specifics of your current on-prem solution (if it exists one), technology stack and deployment preferences.

The deliverable is a POC built with your own data and a document defining:

- An architecture adapted to your current project needs and corresponding to modern data warehousing pattern in Azure
- Roadmap that will help you to achieve your journey to the modern data warehouse
- Guidelines to load and prepare data in Azure

## Day 1

- Definition of project goals (improve loading time, improve costs, improve accessibility of your data)
- Assessment of your current data warehouse solution architecture
- Identification of bottlenecks and improvements

## Day 3-7

- Preparation of a POC on Azure
- Document drafting containing:
  - Architecture adapted to your current project needs and corresponding to modern data warehousing pattern in Azure
  - Roadmap that will help you to achieve your journey to the modern data warehouse
  - Guidelines to load and prepare data in Azure

This assessment is made by consultants who cumulate more than 10K hours of consulting in PowerBI governance projects.

## Day 8

- Review of architecture proposal
- Feedbacks and QA

## Day 9

- Review of modern data warehouse roadmap
- Feedbacks and QA

## Day 10

- Review of guidelines
- Feedbacks and QA

This assessment is made by consultants who cumulate more than 10K hours of consulting in PowerBI governance projects.
