We transform knowledge into innovation.

Our Success Strategy

From research system to knowledge-based assistance system

- Vision:** We turn knowledge into a competitive advantage and value-added factor.
- Innovative companies should gain decisive competitive advantages by successfully and quickly solving complex tasks.
 - Knowledge-based assistance systems become the partner of human in solving complex tasks.

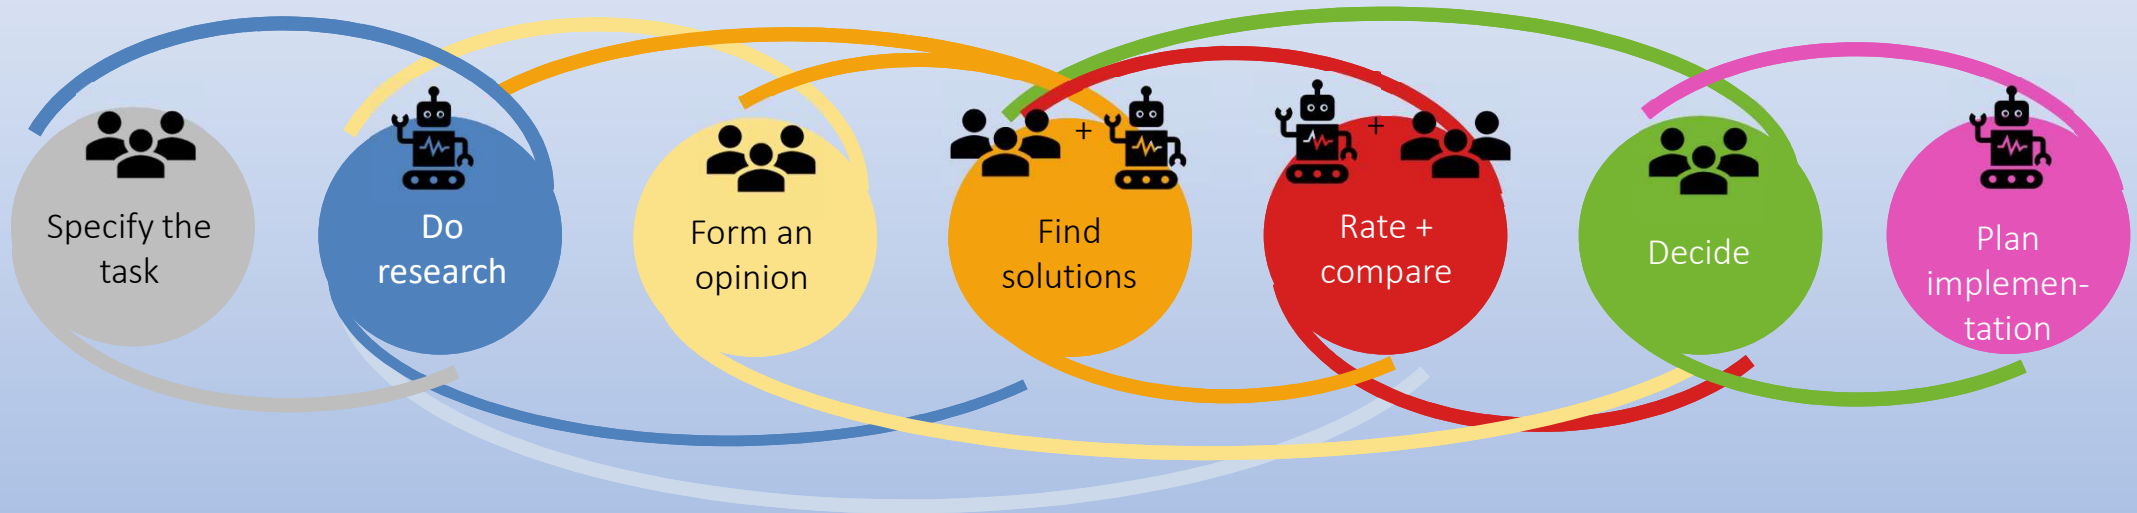

Mission: To turn knowledge into a competitive advantage, our technologies extract semantic knowledge from various information sources, structure it, ensure information quality and prepare it for knowledge-based assistance systems.

Better solutions bring competitive advantages and create outstanding values.

Complex tasks are milestones for a successful company development.

Iterative problem solving process supported by AI

High quality knowledge + human creativity = better solutions

Quick and easy usable

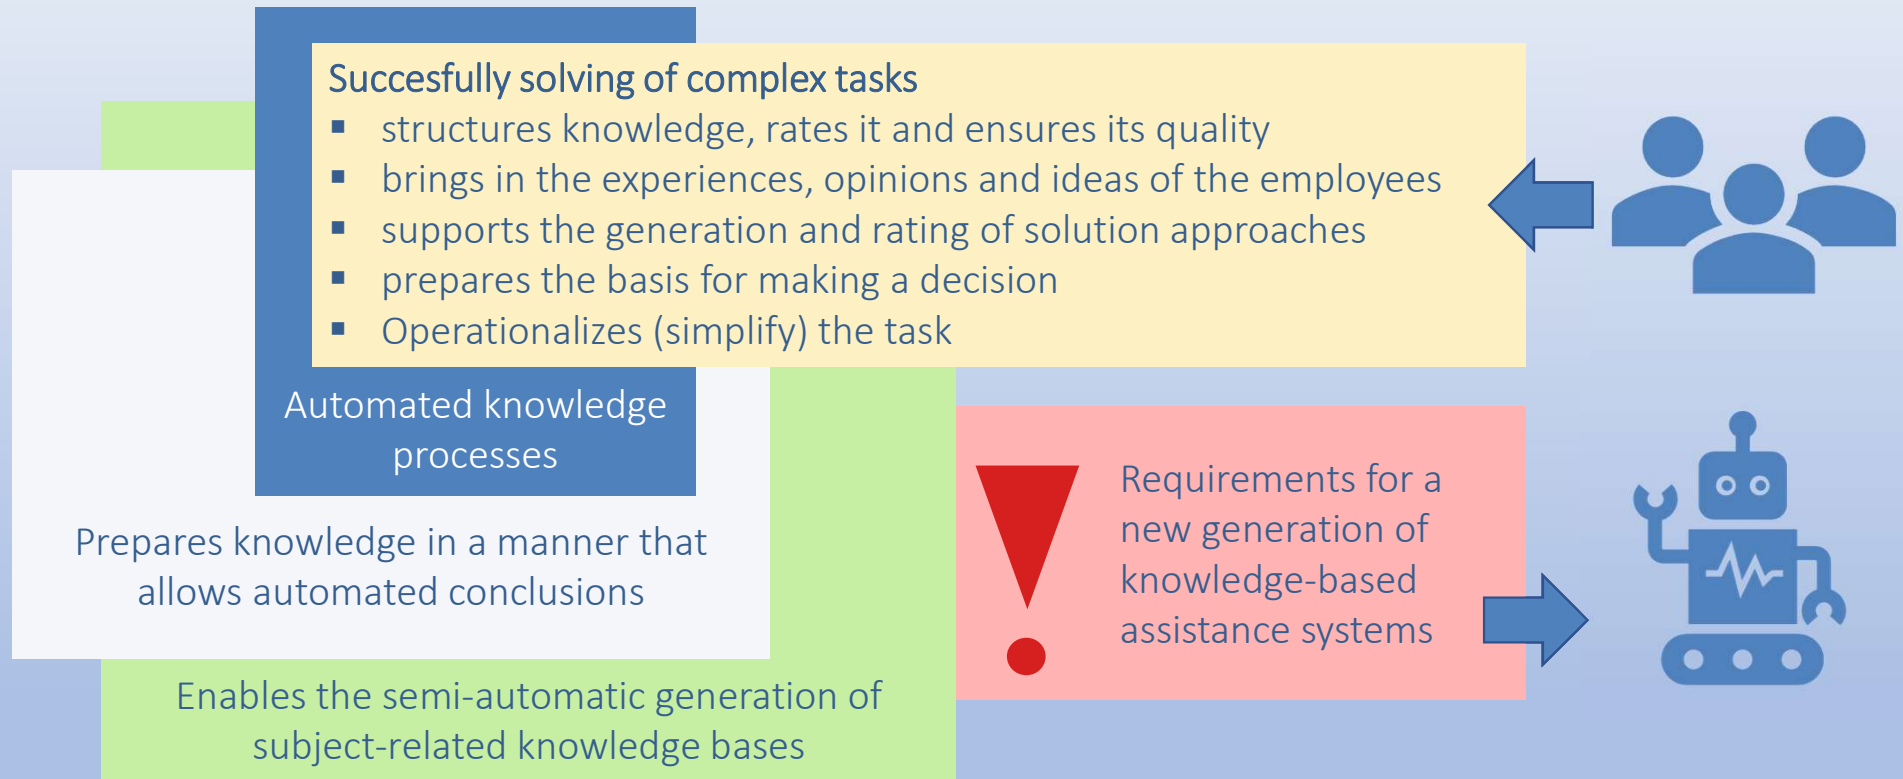

- Multi-tenant-capable system, multilingual, internationally working
- Automatically scalable
- Easy to handle
- On-demand business model
- Available as Software-as-a-Service on CBApplications platform
- Integrated with Office 365 – ready for use in Word, Excel, PowerPoint, ...
- Integrated in Microsoft Teams => Use of the various collaboration functions
- Uses Microsoft KI services (e.g. semantic search)

The screenshot displays the CBApplications web interface, which is a multi-tenant-capable system. The interface is organized into several main sections:

- Top Navigation Bar:** Includes links for Home, Mein Arbeitsbereich, Mein Wissen, Abmelden, Profil, Kontakt, Datenschutz, Nutzungsbedingungen, Vorgang starten, and Roboter starten.
- Left Sidebar:** Contains a search bar and a list of modules: Ideensammlung, Der Problemlösungsprozess, and Beispiele.
- Main Content Area:**
 - Ideensammlung (Ideas Collection):** A section for collecting and managing ideas. It includes a search bar, a list of ideas, and a detailed view of a specific idea (e.g., "Ideensammlung Marketing und Vertrieb").
 - Der Problemlösungsprozess (The Problem Solving Process):** A section for managing the problem-solving process. It includes a search bar, a list of processes, and a detailed view of a specific process (e.g., "Der Problemlösungsprozess").
 - Survey:** A section for conducting surveys. It includes a search bar, a list of surveys, and a detailed view of a specific survey (e.g., "Survey").
- Right Sidebar:** Contains a search bar and a list of themes: ÜBERBLICK, AUFGABE KONTEXTISIEREN, RECHERCHIEREN, MEINUNGSBILDUNG, LÖSUNGSVARIANTEN ERARBEITEN, BEWERTEN UND VERGLEICHEN, ENTSCHEIDEN, and UMSETZUNG PLANEN.

Enabling next generation AI

Knowledge management in comparison

Knowledge based systems

Solving complex tasks successfully

- Focused on content work on concrete task
- Consolidate, structure and rate relevant knowledge and ensure quality
- Integrating people with their opinions, experiences and ideas
- Sharing knowledge in a targeted manner, exchange of experience and comparisons
- Integrated in Microsoft Teams => Use of the various collaboration functions

Making conclusions automatically + learning automatically = knowledge-based assistance system
