

Get Started Modernizing .NET Apps using Azure

Looking to drive cost savings and efficiencies managing your .NET application estate?

Microsoft's .NET Modernization in a Day workshop was built to help you evaluate your applications, prepare them for migration and host them on managed tools in Azure that were purpose-built for .NET.

In our workshop, you will better understand:

- ✓ **How to evaluate and prioritize .NET applications for modernization**
- ✓ **How Microsoft technologies can help you increase .NET application resiliency and allow them to scale easily**
- ✓ **How to modernize your existing applications with**

Agenda:

The morning session will focus on best practices, design patterns and common obstacles to avoid, and mapping out your migration/modernization strategy. The afternoon session will be dedicated to hands-on training with our Migration Assistant and the easy to use Azure App Service and Azure SQL Database offerings that have been custom built to host and power .NET applications.

The workshop runs 9:00am to 5:00pm with a 1-hour break for lunch.

Next Steps:

If you are interested in a scheduling a 1-day Modernization of .NET Apps using Azure workshop for your team, contact Martha Garron at mgarron@wintellect.com or 603.384.1251.
