Provide Deaf customers who use sign language with a world-class Deaf-friendly experience online

Microsoft Azure

Signly – Sign Language as a Service©

Signly supports organisations with a passion for inclusion. Organisations with lots of online content can make it accessible to Deaf sign language users by deploying Signly, which is a world first.

WHAT WE OFFER

Signly – Sign Language as a Service©

Synchronous, in-vision, sign language translations on webpages for any Deaf sign language user

BETTER THAN EMBDEDDING SIGN LANGUAGE VIDEOS
High quality content, perfectly synched to the online text and viewable at source on the content owner's own website, smartly delivered on Azure

FULLY MANAGED SERVICE
Integrating Signly is somewhere between zero and light-touch. Content is captured from the website, created in Signly Studio and served up online, in-vision, just like on TV.

Signly doesn't replace intepreters – it does free up this resource for more valuable work by empowering Deaf users, allowing them to browse content independently

WHAT OUR CUSTOMERS ARE SAYING

"When I first saw the Signly application ad the potential it had to transform the lives of our Deaf customers, to empower them to make better life, I knew Lloyds had to be first to take this to market

—George Booth
Chief Procurement Officer at Lloyds Banking Group

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

WHY AZURE

BE FUTURE-READY

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

BUILD ON YOUR TERMS

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

OPERATE HYBRID SEAMLESSLY

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90% of enterprises globally.

TRUST YOUR CLOUD

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.
