

Cloud Print Management Service

The missing piece to complete your cloud migration

Eliminate Print Servers

Printix is for IT organizations, who are dedicated to implementing an all-cloud strategy and looking to transition their print infrastructure to a cloud service.

We make it possible for customers to install, use and maintain a cloud-managed printing environment quickly, efficiently, and, perhaps most importantly without owning a print server.

The Printix multi-tenant public cloud solution drastically simplifies the provisioning, management and control of printers and drivers from a cloud-based portal.

Simplify Print Administration

Apart from minimizing the on-premise IT infrastructure to support printing, Printix helps IT managers avoid the hassle and minimize costs typically associated with printing and maintaining a print environment.

Printix removes the administrative complexities involved in managing diverse hardware, software, computer operating systems and vendor-specific printer requirements.

Orchestrating and automating routine admin tasks, Printix helps discover, define and configure print queues and drivers and automatically distribute the setup, to keep your print environment running and up to date

Optimize Cloud Integration and Implementation

Microsoft Azure, and other cloud computing platforms, allows businesses to be more efficient and printing should be one of the most basic business processes, to be simplified with the cloud.

Printix is seamlessly integrated with Azure AD and Google G Suite authentication to enable a true cloud workplace with Single Sign-On via Office 365 or G Suite.

Deploying Printix is made easy with Microsoft Intune, or any other software deployment tool that supports Microsoft Installer (MSI).

Serverless Architecture

Eliminate print servers and create a secure, cloud managed print infrastructure.

Simplify Print Management

Simple to manage and easy to deploy. Automatic updates and self-service provisioning.

Improve Productivity

Intelligent print driver selection and print queue installation by location, group or self-service.

Reduce Costs by 50% or more

Significantly reduce on-premise infrastructure costs, services, support and maintenance fees.

Single Sign-On Secure Access

Single Sign-On and secure access to Printix using Microsoft Azure AD or Google G Suite.

Central Management Console

Centrally manage printers and users. Visual analytics to help transform data into insight.

Supports all Network Printers

Independent and multi-vendor support. Print to any printer from any device.

Our powerful cloud technology and innovative client technology is scalable by design and can handle any number of users and printers.

No manual effort is involved in maintaining Printix Client software, as the latest approved versions are silently updated. Processing print jobs is done locally on the computer, so no additional network traffic is needed to transfer print data to a print server. If desired, Printix Client can convert existing office print queues.
