

Fidelity Factory RPA Hackathon

Base Offering Package

We are flexible in this service and will work with each business individually to meet their unique needs. All packages can be customized to accommodate businesses of any size.

One Day Training - Power Automate Desktop 101

The goal of this training is to educate attendees by getting their hands on the tools and building solutions with guidance from our team. The outcome of the training is for the attendees to experience building a Power Platform solution and take the skills and experience to their daily work. Training includes:

- Power Automate Desktop, Power Automate, On Premises Gateway
- Instructor lead training
- Live demonstrations / product walkthroughs
- Lab materials

One Day Hackathon

We recommend a one-day intensive hackathon. Our hackathons are most successful when participants form into small working groups and go through an ideation process to identify business opportunities. Each group will choose an opportunity and build a solution for it, with help from our instructors.

- Fidelity Factory instructors provide solution coaching, guidance, and technical expertise to address key business opportunities

Hack Showcase

- Recognize the efforts and outcomes of the solutions built from small group formation

Pricing for both training days: \$4,999/20 attendees Plus Tax

Hack-Add-Ons

The core offering can be supplemented with additional sessions that include:

- Live Q and A sessions with hackathon participants and Fidelity Factory
- Targeted Training
- Lunch and Learns
- Hackathon support sessions for participants
