

Relesys is a software company
delivering customized communication
& performance apps.

Not just an app

Relesys was founded in 2014 with a mission to transform internal communication and performance management for businesses around the world. We base our knowledge on more than 30 years of experience with HR, Communication, Digital Technology and E-learning that we apply in our customized app solutions.

Frontrunners

Relesys is the first to develop a Retail Performance App. By using features based on intelligent software and elements of gamification the App motivates employees towards better performance and a proactive mindset. We are continuously developing our software to stay aligned with our clients' needs and to push the boundaries of what our app can do.

The Marriage Strategy

We deliver solutions for some of Europe's largest retail businesses as well as some of the smallest. In common for all our collaborations is our mindset to build every relationship for the long run. We are there every step of the way to help our clients grow their people and their business.
