RAPID Platform

A better way to create

O365 business solutions

A tool built by Microsoft Consultants

OUR STORY

Over 6 years ago, we became fascinated with the idea of agile, but witnessed a major problem: nowhere does agile mention or help with 'perfectly scoped projects'. Striving for a 'perfectly scoped project' is nearly impossible as no-one fully understands the solution in detail and the only way to actually get that extra detail is to start trying to solve the problem.

RAPID Platform _____

Everything you Need in One Place

Turn your ideas into a reality, in a matter of clicks. Be it data design and management, process description and automation or even just documentation, Rapid Platform can cover it all.".

What is the Rapid Platform?

"Rapid is a business management solution built from the ground up with native process and analytics support. Rapid solves the problem of IT systems falling behind a business with its cutting edge user driven customization."

One web application to replace them all

Built on top of Microsoft and only getting better from there!

Microsoft at the core

We bring together the whole Office 365 suite

Native User and Group support means you only need to configure security once

Embed Power BI reports directly where you need them

• Outlook

Keep email conversations organized with native Outlook integration

Single Microsoft Sign-on no matter how many tenants.

Azure

Keep your files securely stored with SharePoint.

No-Code Environment

With an intuitive no-code environment, users can easily drag and drop elements to create unique layouts, configure and design fields, link documents and much more!

Build better customer relationships by encouraging co-design and building your clients' system with them.
