

Modern Web Applications

New tools and cloud platforms for the web!

What are Modern Web Applications?

We offer custom software development for modern web applications that include features such as cognitive search that allows users to find information in databases and documents, powerful analytics and dashboards, cross browser support, single page applications, and back-end connections to on premise, cloud native or software-as-a-service (SaaS) applications.

What we do?

Certified in Azure app development

Creative programmers designing scalable solutions

Experts in hybrid integration to connect web to on premise or cloud apps

Conduct Web Assessments to better understand your needs

Provide business analytics via intuitive Power BI dashboards

Develop web applications that run entirely in the Cloud

Provide web management and monitoring services to reduce down time

Why Enkay?

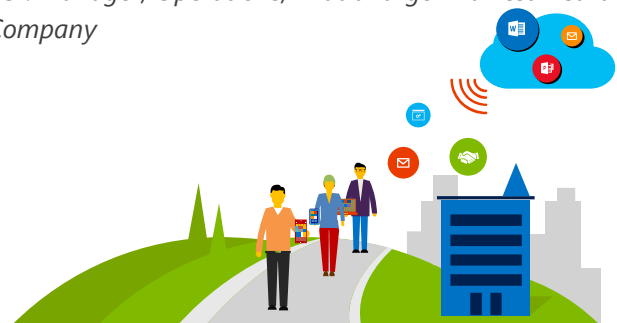

We are a certified **Microsoft Gold Partner** for Application Integration.

Our developers are well trained in Azure applications development, and have experience in all aspects of application life cycle management.

As integration specialists, we have a proven record of successfully helping our customers reduce operational costs, improve efficiency and meet uptime SLAs by recommending changes based on best practices that we have curated over multiple successful engagements.

Our cloud services will allow you to meet your operational SLAs while allowing your end users to focus on your core business

"Appreciate all your hard work and contribution to the quick resolution of some of our Ops related problems!"
- Sr. Manager, Operations, IT at a large Midwest Insurance Company
