

RAINBOW SECURE

Passwordless Login API

www.RainbowSecure.com

Hello@RainbowSecure.com

Colorful, Stylish, Hassle Free Way to Reduce Cyber-attack Risk & Liability

WHY YOU NEED IT:

With rising global cyber-crime costing companies \$5.8 million on average, 80% of which is due to weak, stolen or reused credentials, its time to upgrade with innovation and stop business interruption and data loss.

OUR OFFER:

To solve all these challenges we did lot of user behavior and security research and invented patented award-winning Rainbow Secure Technology. It is a suite of Programming APIs/Plug-ins for Developers to use to create strong Apps.

- ✔ Works on any platform, any device
- ✔ Best UX Experience
- ✔ Integrate with Old & New Apps
- ✔ Minimal Workflow changes
- ✔ Highly Scalable (100K+ Users)
- ✔ Eliminate machine learning attacks
- ✔ Configurable Friction level
- ✔ Protect Data, Login, IoT & Services

- ✔ Defeats 10+ Cyber Attacks
- ✔ Zero-Trust, Anti-Automation Security
- ✔ Anti-Fraud, 24/7 AI monitoring, Alerting
- ✔ Reduce Risk, Liability by 90%
- ✔ Lowest IT Support Costs
- ✔ Forgive human errors
- ✔ Improve Productivity
- ✔ Win Customer trust

HOW IT WORKS:

THE STRENGTH:

Flexibility

Dynamic routing of challenge & token parts on trusted secured channels, web service, emails, phones, devices and more. It defeats SMShing, MIM and Phishing attacks.

The power of Colors & Styles

The strength of the token increases exponentially with 17 million colors and 100+ styles for token. It beats brute-force attacks. The interactive steps of understanding the instructions and applying the formatting beats phishing, OTP token replay, fraud and Automation attacks. Option to use Hexa and RGB color codes make best security available to all types of users.

Easy steps lead to better security

Users' love for colorful UX challenges leads to wider adoption for passwordless login and MFA. Now you can protect wide ranging uses cases that earlier needed costly device tokens & tying up to fixed devices.

DEVELOPER, INTEGRATOR SUPPORT:

- ◆ Get Rainbow Secure APIs Today
- ◆ Get Balanced Friction Security
- ◆ On Cloud, Hybrid Cloud, On-Premise
- ◆ Secure Employees, Partners, Customers Logins & Verifications
