

Accelerating Enterprise AI Projects

Artificial Intelligence
& Machine Learning

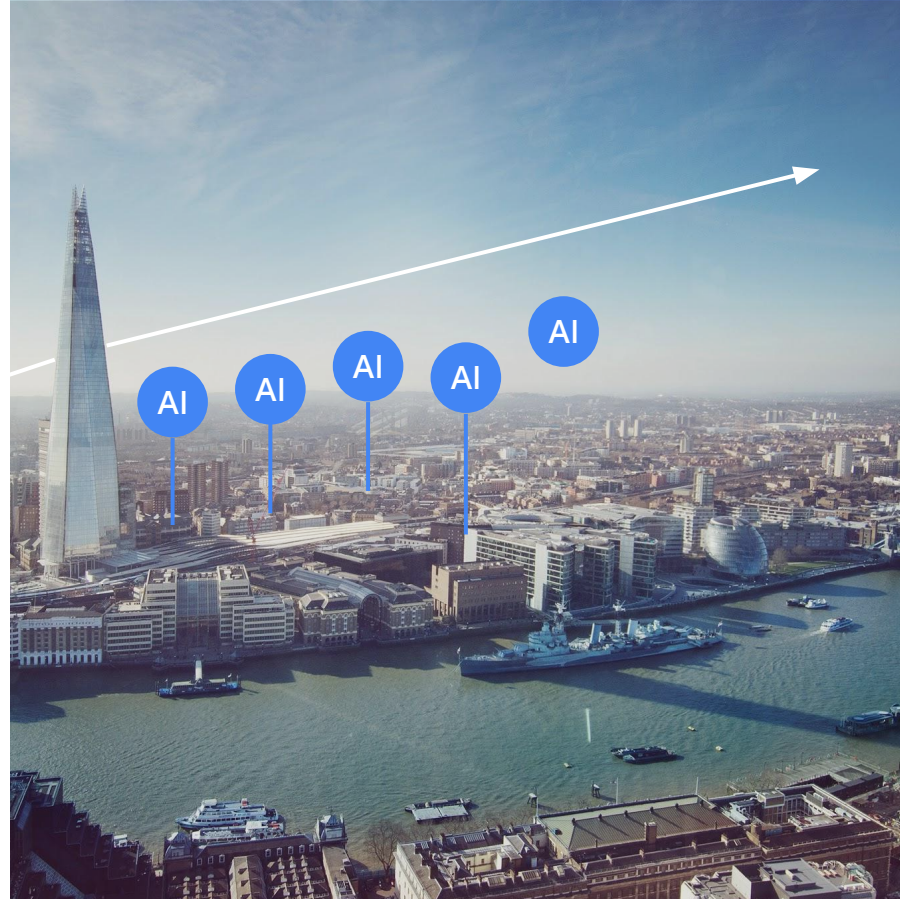

More and more enterprises are taking their first steps in the journey to AI

¹: CIO survey, Gartner

There's a growing demand for AI talent from enterprises at all stages...

Vast majority of these organizations are in the early stages of AI initiatives

Common pathways to AI

Use Point ML Tools

Fewer ML experts required

Train your own Custom ML Models

Dedicated in-house ML team required for training models

AI is complex and overwhelming

Technology

Difficult to scale, with too many choices for different use cases

Operationalization

Managing ML infrastructure takes away time & very few people have ML expertise

Tooling

Complex pipeline with several point tools - work for limited use-cases only

Retailers without the resources to create effective ML/AI **fail to predict accurate product recommendations** for customers...

Wrong product

Wrong character

Wrong material

...Leading to unhappy customer experiences

Finance Institutions
that do not prioritize
ML/AI solutions **fail to
reduce risk, prevent
fraud, and increase
cross selling**
putting 40% of revenue
in certain categories at
risk by 2025.

Manufacturers that have not implemented ML/AI solutions continue to react after the fact without predictive preventative maintenance and process optimization

Companies struggling to build up their AI strategy often turn to **various ML point tools that deliver suboptimal AI capabilities**

...What if there was a
**customizable AI
solution** for solving
your business needs
faster and without the
burden of hiring a
dedicated ML team?

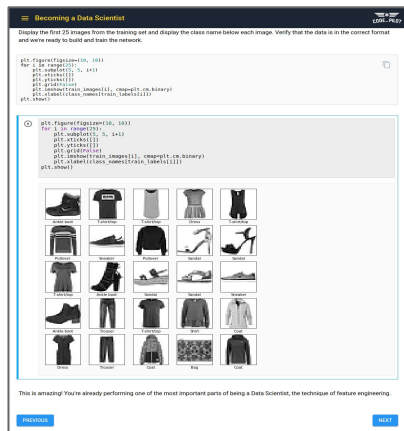

Code Pilot is a **comprehensive solution** for enterprises to rapidly achieve AI solutions by leveraging **preconfigured codebase accelerators** with hands-on training

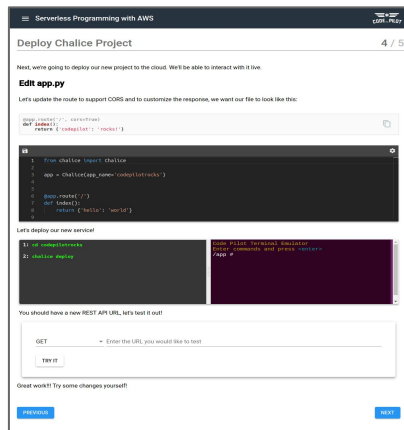

Code Pilot is the first online training platform capable of teaching interactive content for Data Science, Deep Learning on GPUs and full-stack Application Development

Jupyter Based Data Science

Only platform capable of training **GPU** based **Deep Learning** skills

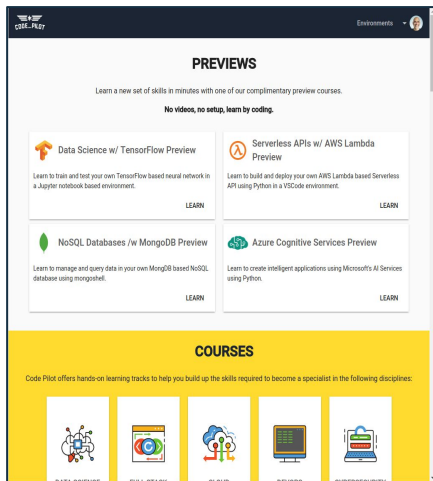

VSCode + Shell Terminal

Replicated desktop development stack built on **100% reactive web-based components**

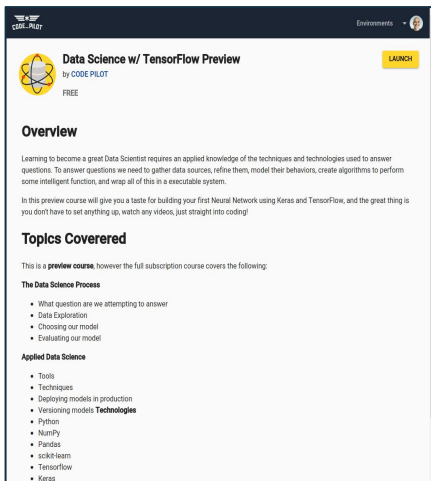

Find, launch and learn in minutes using fully web-based tools like VSCode, Terminal, Jupyter

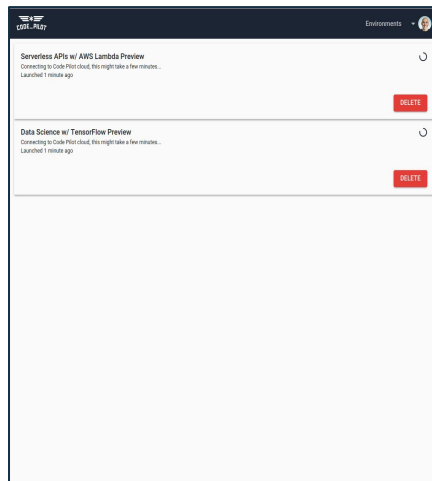

Code Pilot Hub

Learners begin with free **preview** courses

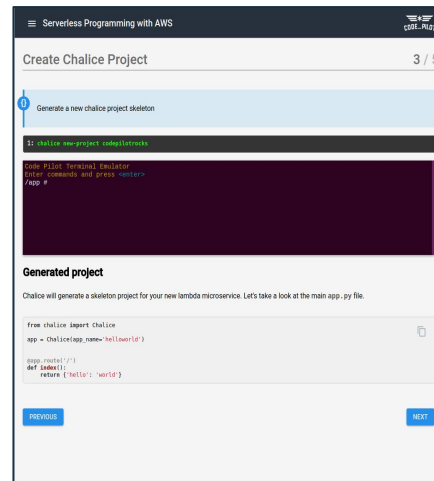

Launch Page

Optimized landing pages per course

Environments

Each course is deployed in a **dedicated cloud environment**

Interactive

Fully **web-based** development environment

Code Pilot is the most fun and straightforward way I've learned a tech skill. Writing code and seeing the results as I go is so effective.

Code Pilot AI Accelerators

Manufacturing

Finance

Energy

Travel and
Hospitality

Healthcare

Retail

Code Pilot AI Accelerators

Manufacturing

- Predictive maintenance or condition monitoring
- Warranty reserve estimation
- Propensity to buy
- Demand forecasting
- Process optimization
- Telematics

Retail

- Predictive inventory planning
- Recommendation engines
- Upsell and cross-channel marketing
- Market segmentation and targeting
- Customer ROI and lifetime value

Healthcare and Life Sciences

- Alerts and diagnostics from real-time patient data
- Disease identification and risk satisfaction
- Patient triage optimization
- Proactive health management
- Healthcare provider sentiment analysis

Travel and Hospitality

- Aircraft scheduling
- Dynamic pricing
- Social media – consumer feedback and interaction analysis
- Customer complaint resolution
- Traffic patterns and congestion management

Financial Services

- Risk analytics and regulation
- Customer Segmentation
- Cross-selling and up-selling
- Sales and marketing campaign management
- Credit worthiness evaluation

Energy, Feedstock and Utilities

- Power usage analytics
- Seismic data processing
- Carbon emissions and trading
- Customer-specific pricing
- Smart grid management
- Energy demand and supply optimization

Code Pilot AI Accelerator Timeline

Schedule an
Envisioning Session to
to identify the right
question to ask so you
can **innovate faster**
and scale smarter with
the appropriate **8-12**
week Accelerator

Why accelerate with Code Pilot?

Expertise

Applied AI/ML experts drop in with proven code, best practices, and skill sets

Speed

Take the AI project from whiteboard to production in as little as 8 weeks

Training

Leverage our experts and hands-on training to take over post accelerator

Realization

Experience measurable ROI from your AI accelerator with the capacity to continue

Better Together

Microsoft
Partner

AI Inner Circle Member

Identify the right question(s)

Contact Code Pilot to begin the discussion

Realize the full benefits of AI in your enterprise.
